EAA Chapter 958 San Marcos, TX
Where every day is a good flying day!

April 2019

Hangar Talk

Hi everyone,

Hope this past month and past holiday weekend has been good for you. We have a lot of things going on with the chapter, with this weeks meeting, the Young Eagles, and the "Go Wheels Up" airshow/autoshow/entertainment, scheduled the following weekend. **And note the change of meeting area for this week.**

"Go Wheels Up"

We're planning to exhibit at "Go Wheels Up" to promote the chapter, the Young Eagles and the proposed flying club. **Volunteers Needed.** We'll need some volunteers for the event and will be signing up folks at the meeting. Plans are to promote the Chapter, the Young Eagles, and the flying club formed around the L'il Angel. We'll have more information regarding the free passes and parking at the meeting. We're planning to have free water (for a \$2.00 donation) to help raise money for the scholarship fund. We're also looking for a couple of homebuilts for display ad-

Chapter Shirts

The latest order of Chapter shirts has arrived and will be available at the meeting. See Phillip Steele to make your payment and collect your shirt. If you haven't ordered a shirt and would like one, there may be several extras, but check with Phillip. We will probably be ordering additional shirts later in the year.

Name Tags

We have name tags available for the following new members: Jesse Cordell, Nick Santangelo, Charlie Gregoire, Mark Needham, Matthew Holliman, Chris Hendricks, Allen Coleman, and William Garner. Please claim them ASAP.

Hangar Talk (cont.)

Young Eagles

There will be a Young Eagles program following the regular Chapter meeting on Saturday. We will be needing several volunteers to help with the ground support so please help if you can. **Don't Forget** all those working with the students must have a current EAA Youth Protection certificate. If you haven't done so please make sure that Dave Falleur gets a copy of your certificate for our records. We have a group of 26 students coming in this Saturday and weather looks to be good so lets work to show them what aviation is all about.

Flying Club

There have not been any advances on the flying club development as Greg has been busy recovering from some surgery, but the L'il Angel is close to being airworthy and more progress will be made once the little Cessna is airborne and signed off. We do plan to have L'il Angel on display at "Go Wheels Up".

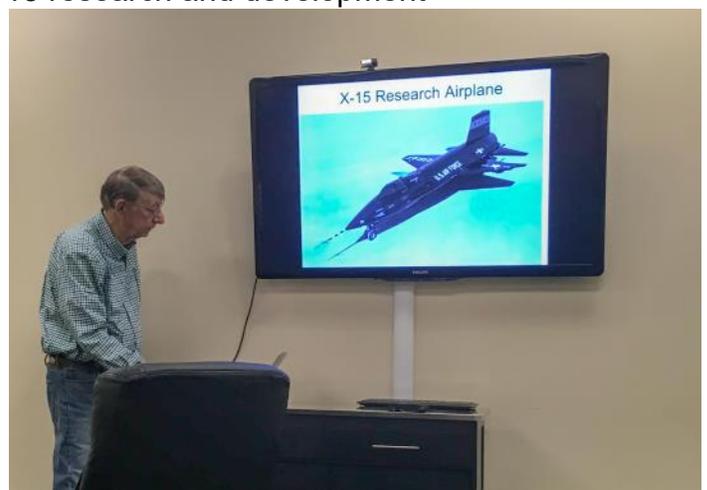

Ray Scholarship

Greg has also volunteered to serve as mentor should the chapter be awarded a Ray Scholarship. The chapter is in the selection queue so we'll just have to wait and see if the chapter gets approved.

Ron Panton Relates history of X-15 Development at March Meeting

University of Texas School of Mechanical Engineering, Associate Professor Ron Panton intrigued the chapter with his history of the development of the X-15 rocket plane. He covered the various twists and turns experienced in the research and development of the aircraft and problems associated with speeds greater than Mach 1.

Ron explains the aspects of the X-15 research and development
