

EAA106 program: **Icing Is a Killer - Do Not Let Winter Bring You Down**

Managing the Hazards of Aircraft Icing during Take-off, Cruise and Landing

FRI, October 9 – 7 PM (EDT) – On-Line (zoom link below)

This event will cover the hazards of aircraft icing - why it forms on aircraft and what to do about it. Get ready for the upcoming winter season. Aircraft icing during flight can be catastrophic. It disrupts the flow of air over the aircraft, which reduces lift and increases drag.

Want FAA WINGS credit? – If so, be sure to register in advance at:

https://www.faasafety.gov/SPANS/event_details.aspx?eid=101998

During the program, send a **PRIVATE CHAT** (only to Penny, FAAS Team Rep) with your registered name (can't tell from most screen names) and the word: **WINGS** (to “check in” for your FAA WINGS credit).

About our SPEAKER: [Ken Knopp, EAA106 member and so much more ...](#)

Ken Knopp, FAA Deputy Regional Administrator, New England Region, recently joined the FAA New England Region office as Deputy Regional Administrator. Previously Ken was the Chief Scientist and Engineer for the FAA Aviation Research Division at the FAA Technical Center. In this role, he led the effort to identify future research challenges in multiple research disciplines. He coordinated communications to other research entities that include NASA, DOD, International and academic institutions. Ken has over 30 years of technical expertise in the aviation industry. Ken has a broad range of experience in research, development, test and evaluation of structural integrity, structural safety, maintenance & inspection technology, aircraft icing, propulsion & fuels, advanced materials, aircraft catastrophic failure and more. He has also provided strategy and direction in defining, communicating and implementing a broad spectrum of new agency management policies and initiatives. Ken is an active pilot with Commercial ratings in both fixed-wing and rotorcraft.

Questions during Ken's presentation? Send via chat (bottom center button) **to “Everyone”**

Someone will be monitoring the chats to “Everyone” and will be conveying your questions to Bob.

Please remain on MUTE during the program to avoid background noises.
