The answer: As listed under contractions on the faa.gov. BA GOOD means braking action good. The other options are BA GOOD TO MEDIUM, BA MEDIUM or BA MEDIUM TO POOR etc.

Instructional Notes: The RCAM braking action codes and definitions are shown below. The Assessment Criteria is associated with how an airport operator conducts and reports a runway condition assessment for a paved runway. The Control/Braking Assessment Criteria is associated with the pilot’s experience with braking action.

• Slippery When Wet (wet runway) • Dry Snow or Wet Snow (any depth) over Compacted Snow Greater than 1/8 inch (3 mm) depth of: • Dry Snow • Wet Snow Warmer than -15°C outside air temperature: • Compacted Snow	3	Braking deceleration is noticeably reduced for the wheel braking effort applied OR directional control is noticeably reduced.	Medium
Greater than 1/8 inch(3 mm) depth of: • Water • Slush	2	Braking deceleration OR directional control is between Medium and Poor.	Medium to Poor

The previous owner, a good friend, pampered this plane for 40 years. I purchased it from him with the intent to bring it up to perfect condition and sell it. It is a delight to fly. Straight and level with hands-off, it indicates 105 mph. Everything works. There has been no expense spared in preparing this gorgeous old bird for the next owner. It draws a crowd and wins trophies everywhere it goes. Contact me to receive a photo album.
