

West Central Georgia EAA Chapter 677

Columbus, GA

August 5, 1985

MEETINGS

The August Meeting will be held at the First Federal Savings and Loan on the Bealwood Connector on August 8th, 1985.

We will have several members tell about the EAA 33rd Convention at Oshkosh.

FLY-OUT

We had a spontaneous fly-out to Wetumpka, Al. Those attending were Doyle Dair, Don Breedon, Joe Dunaj and Lonnie Wilson.

AIR-SHOWS

The old South Fly-In on Labor Day Weekend will be held this year in Rome, Ga. instead of Tullahoma, Tn. This will be closer to home and we hope to have a number of aircraft to go to this one.

Columbus will have our air-show on Sept. 28th, 1985. We are still working on a consession stand and hope to have this formed in the near future.

MURPHYS LAWS APPLIED TO MAINTENANCE, MECHANICAL

1. A dropped tool will hit a spot where it will do maximum damage (Murphys's Law of Selective Gravitation.)

2. After an inspection plate with 16 screws has been removed, it will be discovered that it was the wrong plate.

3. After 16 screws have been replaced in an inspection plate, the gasket will be found on the bench.

4. Any cable cut-to-length will be to short.

5. Tolerances will accumulate toward maximum difficulty of assembly.

6. Interchangeable parts won't.

7. The component most likely to fail will be the least accessible.

EDITORS NOTES

I would like to take this opportunity to thank the follow-people for helping me on our newsletter.

To: Brad Laylton for drawing the cartoon for each issue. This has added greatly to our newsletter.

To: Bill Cornele for doing all the typing and getting everything together.

We still need input from members and readers.

Vernon Prater
