

EAA106 monthly weekend program: **Building Your Own Kit Aircraft**

Kit planning & selection, building, inspection, documentation, flight testing & more

SAT, September 26 – 9 AM (EDT) – On-Line (zoom link below)

Have you ever wondered what's involved in building your own aircraft from a kit?

In this 2-1/2 hour free webinar, you will learn about the planning, kit selection, building, documentation, inspection, repairing, flight testing, and operating your "homebuilt" (aka E/A-B, Experimental / Amateur-Built) kit aircraft.

Want FAA WINGS credit? – If so, be sure to **register in advance at:**

https://www.faasafety.gov/SPANS/event_details.aspx?eid=101653

During the program, send a **PRIVATE CHAT** (only to Penny, FAAS Team Rep) with your registered name (can't tell from most screen names) and the word: **WINGS** (to "check in" for your FAA WINGS credit).

Bob built and is currently flying this Vans RV-8.

About our SPEAKER: **Robert Di Meo, EAA106 member and so much more ...**

Flying since 1979, Bob has over 6500 hours. ATP, MEI, CFI, CFII, EAA Tech Counselor. Currently flying for Kollsman Inc. as a test pilot for HUD, EVS and Joint Strike Fighter product lines. Has owned a Piper Arrow, C-172, Piper Aerostar and Piper Comanche. Bob is currently co-chair of our annual NorthEast Experimental Fly-In and former EAA106 Vice President.

Questions during Bob's presentation? Send via chat (bottom center button) **to "Everyone"**

Someone will be monitoring the chats to "Everyone" and will be conveying your questions to Bob.

Please remain on MUTE during the program to avoid background noises.

ZOOM link via PC, Mac, Linux, iOS or Android: **<https://brandeis.zoom.us/j/95072279440>**

If you do need the list of phone access options, send an e-mail to: **EAA106.INFO@gmail.com**

Note: This live event will be recorded and posted to our chapter website so that those who miss it may watch it at: <https://chapters.eaa.org/eaa106/flyers-page>
