

MAPA NEWS

Mid-American Pilots Association

The club has been busy! On February 15th we hosted an EAA Young Eagles Build and Fly program. Over 40 kids ranging from eight to seventeen came out to learn more

about flight and flying R/C aircraft. They had six stations to flow through during the program. There was ground school, R/C Sim, Full Scale Simulator, R/C flying, an

airplane tour, and most importantly, a build shop!

The kids had a great time and the adults that volunteered loved seeing all their excitement as well. Several kids were even able to take a Young Eagle flight after the program concluded. We hope to have many more kids added to roll of the world's largest logbook with our end of the month Leap Day Fly-In Breakfast.

MAPA NEWS

Mid-American Pilots Association

The Leap-Day Breakfast is fast approaching on the horizon like a jet on a CAT III Approach out of the fog! Plans are being made and weather forecasts are being triple checked. Updates on the breakfast and all of ours news can be found on our Facebook page at facebook.com/flyMAPA/

Just as we went “to press” we had news that our second club member earned his Private Pilot’s License! Tyler Funk passed his exam on February 27th! CONGRATS!
