

October Newsletter

Welcome members and friends of EAA Chapter 1241

It has been hot in Marathon and this has been some year so far. I realize that we may not have many members at this October meeting but many of our members in other parts of Florida want to fly to the keys for a day. We are not having much in the way of what is going on, but I know that all pilots have stories to tell. It will be great to see some of you that I have not seen in months. The museum has been opened since July, but it has been slow. The flight school is doing well and owned by Sol Bradman. It seems more people are learning to fly since the pandemic, and I know the prices of small airplanes is going up and harder to find.

Thank you for all your patience with the chapter.

Your President

Ed
