

PROJECT FOR SALE

1978 CITABRIA 7GCBC \$70,000—MORE THAN \$75,000 INVESTED (not including my labor)

Total time before rebuild: Airframe—2731.1 Engine: 0-320-A2D 192.2 SMOH

Registered with the FAA until Jan. 31 2026 as N2672Z.

Rebuild stopped due to Covid and continuing vaccine allergy:

1. Fuselage stripped, inspected, repaired where necessary, coated, all new wood, new skylight, new wiring, new radio ground plane, new sewn Ceconite envelop included, baggage door mod installed etc.
2. Wings stripped, inspected, repaired where necessary, all aluminum ribs to spars nails removed and replaced with reticulated stainless steel nails, new rib tape, and new wiring. Ceconite covering, dope coated but needs some final tapes and final coat before silver coat. Wing inspection panel mods available to be installed. Aeroled strobes wired but not installed.
3. Control surfaces stripped, inspected, repaired where necessary and coated. Ceconite covering, dope coated but needs some final tapes and final coat before silver coat.
4. Interior panels, and seats upholstered. New instrument panel and glare shield. Aspen 1000 EFD and EFD500- SW v2.X installed. New LED map light. New lighting panel. New PS audio Panel. Vacuum system removed, now all electric. Needs backup attitude indicator for IFR.
5. Numerous installation manuals, including Citabria service and parts manuals.
6. All log books. Work to date signed off by an A&P / IA.
7. More than 600 photos, videos, diagrams, drawings and printed documents available on a thumb drive.
8. All four wing support stands, two fuselage support stands and engine support stand included. Many more parts to finish the project included. Some minor parts might have to be procured.
