flight

Young Eagle Tristan  
Werner gives interview to  
Channel 10

# 2010

Paul Hanson needed to work on the bottom wing of Offshoot, and didn't want to have to do it on his back.

He built a frame for the plane, rigged up a tower on the back of his truck using one of the portable hangar support columns and an electric winch, and pulled the plane up on its nose. Here he is shown at work – sitting down!

2010

Jim Chapman and  
Dennis Cullum work  
on the golf cart
