

Minutes for EAA Chapter 1445 May 21st Gathering

The May 21st gathering was held at Chuck Millar's Airfield outside of Maricopa, AZ.

This gathering was a skill and knowledge building work shop. Members had the opportunity to get hands-on experience with coaching from skilled and knowledgeable members. The event's informal format allowed members to ask questions and take as much time as they wanted in the specific disciplines of interest.

Sheet Metal was guided by Bob Meyer, with assistance from Kelly McMullen, and included drilling, dimpling, riveting, and rivet removal.

Safety Wiring was run by Kevin Deutscher and covered safetying of bolts, nuts, and turnbuckles.

Jerry Latimer drew a lot of interest on his 3D printing show and tell.

Chuck Millar and Scott Todd gave tours of the Millar Airfield and Military Aviation Museum.

The final station for the workshop was Rick Drown cooking up some delicious burgers and brats.

A special thanks to Chuck Millar for hosting our gathering, Bob Meyer for all his work in putting this together and prioritizing fly-in safety, and to those others mentioned here and the other members who stepped up to make it a very pleasant day.

Noteworthy was Kelly McMullen's attendance and help with the Sheet Metal station - Welcome back Kelly!

We had a number of guests and new members - the chapter is growing!

Visit our website for a short video and pictures.
