***New Day and Time for  
EAA145 Meeting: FRIDAY  
JUNE 9, 7:00pm***

Program for Friday, June 9, 2006, 7pm, at  
the EAA hanger, Riverview Airport.

The Chapter program will be in two parts:

First a member discussion on  
ideas for making some money  
(think about this and bring  
your ideas to the meeting).

Second a 30 min historical video  
“The Tin Goose”. The rest of  
the story about Bill Stout and  
the Ford Tri-motor.

Join us for coffee, desert and  
hanger flying...see you Friday.

**Notes from last month's meeting,  
April 8, 2006**

Chapter 145 met in the EAA hanger  
at Riverview airport. Hugh  
welcomed everyone and reviewed  
Chapter activities. Bill Willard gave  
a financial report and suggested that  
the Chapter look into ways of  
generating monies to help pay for  
the hanger activities.

Chuck Helmholdt presented a photo  
record of his experience in building  
his own 180HP, Superior XP360  
engine. His family went to Texas  
and assembled the engine that will  
power his experimental aircraft. The  
Chapter thanks Chuck and family for  
the interesting presentation.

The progress in RV construction in  
the EAA hanger was “inspected” by  
all members ...the consensus  
excellent workmanship!

**NOTE :**
