### Special Note:

#### Chapter 18 Tuesday night meeting will be an hour early this month

The chapter membership meeting will start at **6:30 PM** at the C. A. P. Hanger at Timmerman Field. This is to give us more time to check out all of the airplanes your fellow members will be flying in. Past years have attracted as many as 10 aircraft. Don't miss this year's fly-in. Also, there will be no board meeting this month.

## PROJECT PATROL

On March 28th, about 30 members and acquaintances all gathered at the Gristmill in East Troy for breakfast. We practically took over the entire restaurant on this otherwise sleepy Saturday morning. After eating, we all headed over to East Troy airport to have a look at Jeff Point's Breezy and then over to Tom Stranak's RV-7. After that, we all headed to Brookfield to see Andreas Kerwel's RV-10. Over the past 2 months, I've highlighted each project with a few pictures and a little information on it.

The third and final project highlighted this month is the unmistakable Breezy, built by Jeff Point.

**What airplane is it?**  
Breezy

**When did you start building it?**  
2008

**When do you plan on flying it?**  
Next year if all goes well, but you know how that goes.

**Where did you build it?**  
Mostly in my garage and the big pieces at my hangar.

**What engine does it have?**  
Cont. O-200 from Ol' Ironsides, currently being major overhauled.

**What avionics are installed?**  
Avionics? In a Breezy? Basic VFR and one comm radio, that's it.

**Anything else you would like to include.**  
Scratch building is a lot more work than kit building, but it is also more fun and more rewarding. It's also much more economical and a cheaper way to get into home building. For \$500 in materials you can spend an entire winter building wing ribs without having to drop \$8000 or more on a wing kit.

**Wednesday, July 22, Music and the Apollo 13 Mission:** Enjoy the world's only official volunteer air show concert band as it opens the evening program at 5 p.m. Then get ready for a real treat as EAA commemorates the 45th anniversary of Apollo 13, with flight director Gene Kranz, astronauts Jim Lovell and Fred Haise, and other team members from what was called a "successful failure" of the aborted moon mission. **Saturday, July 25, WWII Pathfinders:** We wrap up another stellar year for evening programs at Theater in the Woods with a special program dedicated to a pair of World War II leaders who helped pave the way for those who followed. Col. Charles E. McGee, pilot with the Tuskegee Airmen, the United States' first squadron of African-American pilots during the war, and Bee Haydu, a WASP (Women Airforce Service Pilots) who helped spearhead the effort to recognize WASPs as veterans, which finally occurred in 1977 under President Jimmy Carter.

- I had completed RV-6A tail and wing kits, and had started the fuselage kit, when I lost two brothers and a nephew in a Cirrus accident in 2001. I lost interest and the kits have been sitting untouched since then. The wing bottom skins were damaged in a move to Wisconsin from Texas. The fuselage frame was clecoed together but no skinning started. At this time, I would like to dispose of the kits and was wondering if you might know of someone interested in taking it over, or if a school might want to use it for parts. ### **WANTED TO BUY, RENT or BORROW**

- Craig Henry is looking for a bending brake for RV ailerons. Those of you who are RV builders know exactly the part that I am talking about, and if anyone has one available, please contact Craig at 414-899-5980 or [Glasair2@aol.com](mailto:Glasair2@aol.com)
- I am shopping for a Light Sport eligible aircraft located in the Wisconsin or nearby surrounding area—something we can use through the upcoming summer flying season. My wife and I are currently flying a Starduster Too, but issues with my 3rd class medical will require that I make the switch to Light Sport, at least for a while. We do presently have a Taylorcraft, but it needs some rebuilding and won't be ready to fly for at least a year. So, we are looking for a solid, airworthy Light Sport eligible airplane that doesn't need any or much work. Types we have been considering: Aeronca Chief, Taylorcraft, Luscombe, Ercoupe, Rans S6, Kit Fox 4, Zodiac 601 XL-B and others. They are cabin types and side by side. (We have two young grandchildren we would like to introduce to flying.)
