Can You Identify This Aircraft?

Send your Answer to sdthatcher@bellsouth.net
The answer will be in Next Months Hangar Talk

Find the Air Speed Indicator

Hidden somewhere within the pages of this newsletter is an ASI similar to the one shown here (will be smaller). All you need to do is find the page on which it appears, specify article or photo and send to sdthatcher@bellsouth.net to win. **If Multiple entries, only one winner will be selected from those submitted.**

Winning Entries will be published in the newsletter. **One Prize Only** awarded for correct ASI location.

Last Month's ASI (Jan-Feb)

Location: Page 3. Between Russ's vertical & Horiz stabilizer.

Aircraft Identified By
Rick Golightly, Lancair 360

Calendar of Events

Mar 12 EAA Meeting

Breakfast includes sausage, eggs, pancakes, fruit and coffee!

April 5-10 Sun 'n Fun Expo Lakeland, Florida

VMC Club Following Meeting

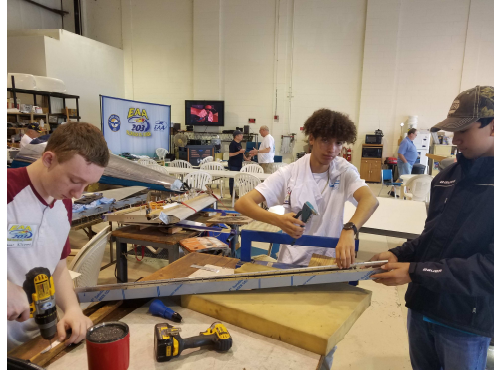

The VMC club is an opportunity to share knowledge and experience while discussing real-world scenarios. The next meeting is this Satur-

New Website. Go to <https://chapters.eaa.org/ea203> to see the new look! New Category called Membership Forms allows you to print out necessary documents.

Young Eagles This Saturday!

Contact Rick Golightly if you can help this Saturday. Need volunteers. 561-747-9100

Young Eagles

Meeting Directions

Ever wondered what your neighborhood looks like from the sky? Or maybe you're

curious how airplanes even work. You might even dream about being a pilot.

If you're nodding your head "Yes" and are between the ages of 8 and 17, you're ready to take a free Young Eagles flight and see what real pilots do on the ground and in the air.

Since 1992, more than 2 million Young Eagles have enjoyed a flight from EAA's network of volunteer pilots.

For more information contact Rick Golightly, metro9100@aol.com.

The next EAA Chapter 203 meeting will be held at the hangar located at North County Airport (F45). The EAA Hangar is found by going to the junction of the Beeline Highway (SR710) and PGA Blvd (SR786). Then go 2.6 miles NW (from PGA); turn left at the airport sign, and cross the train tracks. Follow the road to the hangar, which is on the left-hand side before you get to the FBO terminal, hangar 11250-5.

Last Month's Aircraft Identification

The Lancair 360 is a two-seat aircraft marketed in kit form. It is a low-wing monoplane of conventional configuration with retractable tricycle undercarriage. The Lancair Legacy was chosen to replace the Lancair 360 in 1999.

Lancair first started manufacturing aircraft in 1984, building kit planes that had to be made up by the buyer. The company won several prizes for its innovative aircraft, and founder Lance Neibauer was given an award by the Experimental Aircraft Association (EAA).

All of Lancair's kit planes were classified as Experimental Aircraft by the FAA, which meant that at least 51% of the aircraft had to be built by the buyer or another individual, if necessary, with Lancair helping them. There are still several Lancair kit planes in production.

However, the kit for the Lancair 360 has now been discontinued. In its time, it was a more powerful development of the Lancair 320, which was a two-seat single-engine light aircraft based on the earlier Lancair 235. It had low wings and a retractable tricycle undercarriage.

It was discontinued in 1999 and replaced with the [Lancair](#) legacy. However, Lancair continued to support the Lancair 360 with parts and technical assistance and does so up to the present day.

In 2017 Lancair was sold and renamed Lancair International LLC. But the company still continues to operate, build aircraft, and support those already made and still flying.

General Characteristics

Crew: 1

Capacity: 2

Length: 21 ft

Wingspan: 23 ft 6 in

Wing area: 76 sq ft

Aspect ratio: 7.266

Airfoil: NASA NLF(1)-0215F

Empty weight: 1,090lb Varies, based on Engine and Options

Gross weight: 1,685 lb

Fuel capacity: 40-44 gal

Powerplant: 1 × IO-320/IO360 Lycoming, 160–180 hp

Propellers: 2 or 3-bladed

Performance

Maximum speed: 255–260 mph

Cruise speed: 235 mph

Stall speed: (68 mph) Landing Configuration

Range: (580–730 mi) (75%, std/opt fuel)

g limits: +9.0 -4.5

Wing loading: 22.17 lb/sq ft
