

## Level 2 Orientation Checklist - Self-guided Version (v6)

**Introduction:** The purpose of the following checklist is to provide a sample of some of the training videos that are part of the “Getting Started With Flight Simulation” course available from PilotWorkShops. Trainees are encouraged to purchase this course for their own use at home. Topic item 3.3 below includes a link to a \$20 discount offer from PilotWorkShops. This would make the price for you \$79, which is an excellent value. Also, there is a 90-day money-back guarantee if you are not satisfied with the course. By doing this you will be able to view all of the training videos at home using your own login.

**Checklist Procedure:** For topic groups 1 and 2 below, the ‘Section’ column identifies the proper page at the PilotWorkShops website where those videos are located. If your web browser is setup with an automatic login, this should take you to the section where the listed topic(s) are located. Then scroll down the web page to find the topic and click on the “Watch Video” link below the topic description. For group 3, click on the topic description to go the website (no login account needed). To receive credit for this level 2 orientation, you should view all videos in the first two groups (Part 1 and 2)..
