President's Message

Good flying weather is here, and it's only a few weeks until Airventure. There are plenty of aviation activities in the works, so check out Bill's "Mark Your Calendars" section for the enjoyment you deserve this summer!

June Meeting Summary

At our June meeting we presented first flight plaques to George Skinner and John Richards; George for the first flight of C-FJJS, his Zenair Zodiac 601HD on Aug 14, 2007, and John for the flight of C-GYZZ, his Wittman W10 on October 16, 2006. Congratulations to both on the best milestone to be reached by any homebuilder! Both George and John had their craft at the hanger and on display for us to admire.

A number of other projects were also at the hanger for our June meeting, including Andy Phillips' RV 7A, Gary Loubert's Sonex, Mark Briggs' Davis, and Curtis Hillier's Davis. Perry Casson's RV 10 was also still on the field due to a weather delay in his return to Regina. All in all, it was a very impressive line-up of homebuilts that Chapter 245 is extremely proud of.

Ottawa Air Show held at CYRP on June 28/29

The Ottawa airshow was held on Sat June 28 and Sunday June 29. EAA. Chapter 245 set

up a booth at the North-East corner of the row hanger to let people know what we are all about, and had Irving Slone with the Pietenpol on hand to show all comers what homebuilding can achieve. John Montgomery organized the booth and populated it with pertinent information which was then distributed and explained to the interested by John, Russ Robinson, Irving Slone, Mark Briggs, Russell Holmes, George Skinner and myself. Curtis and Sean Hillier provided security for our area. Rod Neufeld and Jack Thorpe volunteered in other areas of the air show.

On Saturday, the weather was not good at all, and only a few of the air events went ahead. Attendance was poor. We were fortunate that Russ Robinson had provided a shelter that we could huddle under to keep dry. Sunday's weather was much better, and all of the planned airshow events were held. Attendance was also much better, although the field was not crowded. We met quite a few interesting and interested characters, including a homebuilder from the Yukon who has built three aircraft, and a recent transplant from the UK who was suitably "gobsmacked" at how easily (relatively speaking!) it is to build, register and fly homebuilts in Canada. We may have some new members soon!

Thanks to all the volunteers involved and especially to Curtis for coordinating with the airshow management and John for providing our presentation material.

Clubhouse Cleanup to be held Aug 9, 2008

The cleanup day originally scheduled for May will be merged with the breakfast setup day this year. Grant will be away for the day, and Curtis also has other commitments, so the BIG BOSS will take over and supervise. WE NEED YOUR HELP. We will start at 8:00 AM and will clean up the lounge, workshop and hanger, followed by setting up everything needed for the breakfast. Coffee and donuts will be provided to keep everyone's energy level high. Entertainment will be provided by the members and the student pilots. If past years setups are any indication, we will be ready shortly after noon.

Chapter 245 Fly-in Breakfast on August 10, 2008

This is the last newsletter to be published before the fly-in breakfast, so don't forget that it is scheduled for August 10th – that's less than 3 weeks away! If you haven't already done so, please mark your calendar and let Curtis know that you will be there as there are still empty spots on the volunteer list.

Alternate Location for Fall 2008 Chapter 245 Meetings

I have been informed that a major renovation will be taking place at the Canadian Aviation Museum over the summer and in the fall of 2008, and that the Bush Theatre will not be available for meetings during this time. Accordingly, we will need to arrange for an alternate facility to hold our September, October and November meetings. At present, I have not found the right location, so I

will have to inform you of the venue in the September newsletter. If you have any suggestions, by all means let me know at 613 850 9260.

Upcoming Meetings

The next regular meeting will be held at 10:00AM on Saturday, July 19th at the EAA Hanger on the Carp Airport.

This month I will again bring my wireless modem so that we can log on to the Airventure page and review the aircraft approach procedures for the fly-in. Bill Reed has agreed to man the mouse and provide helpful hints to those who want to take their planes this year.

After the procedures review, Russ Robinson has agreed to man the BBQ for hot dogs and hamburgers to round out the day.

19 Jul 2008	Oshkosh Prep at CYRP Hanger Sat 10:00AM
10 Aug 2008	EAA Chapter 245 Fly-In Breakfast – Volunteer NOW to Curtis Hillier
18 Sep 2008	EAA 245 Fall Meetings resume; venue to be announced in September

Hoping to see you all at the July meeting, and as always-

Blue Skies,

Martin

Chapter Fly-in August 10th

This is just a reminder we have very few people signed up for this years fly in breakfast.

We always seem to get enough volunteers but it sure is nerve wracking with out names next to the critical jobs on our duty list.

Please take a few minutes to look at your summer time and see if you can commit to helping

us out with the fly-in breakfast set up, breakfast cooking duties or both!

This is our only fund raiser, we have a lot to worry about, we hope volunteers are the one thing we will not have to work hard to set up.

Thanks to those few who have already faithfully said they will

help, there are a lot of openings on the sheet.

Send me an email with your desired function from aircraft traffic to pedestrian traffic to cooking, or cleaning or simply set up help.

Thanks!

Curtis

Editor's Comments

This month we do not have a feature article. My inbox is empty so if there are any technical articles or travel stories

that you would like to submit please email or send them to me at the address listed on the front page.

There will not be a newsletter in August.

The fly out possibilities has been expanded to include August

events and September events up to our next meeting date.

If you have pictures fro Oshkosh or any other interesting plane, construction item or travel

scenery please submit them to the newsletter editor.

Last month I missed the Wayne's Exhaust entry from 20 years ago

so this month we have two summaries from 20 years ago.

*Best Regards,
Bill R*

Aviation humour

From AVwebFlash Volume 14, Number 28a ninth of July 7, 2008

SHORT FINAL

Overheard in *IFR Magazine's* "On the Air"

I was departing Terre Haute, Indiana. The ATIS said clear below 12,000, but I could see a scattered layer of clouds to the south with tops around 4,500 feet. After tower switched me to departure, there was this exchange:

Cessna 123 (me):
"Approach, Cessna 123. Request VFR-on-top 5,500."

Controller (sarcastically):
"Cessna 123, it's called 'clear.'"

Cessna 123 (me):
"Then I'd like to report strange puffy white things with tops

around 4,500, 12 o'clock, 10 miles."

The controller must not have understood that VFR-on-Top does not require clouds.

John Rudolph
Evansville, Indiana

More Local News

Aluminum Pop Can Recycling Program

As most of you know Irving Sloan has been running an aluminum pop can recycling program on behalf of the

Chapter for more than a year. All funds raised are donated to the Chapter to cover our operating expenses. Please donate your pop cans to this program, either by dropping them off at the Chapter hanger

at the Carp Airport or by bring them to the Chapter meetings at the Aviation Museum – let's all support Irving's work.

EXHAUST – from the Carb Heat Archives 20 YEARS AGO June 1988

Local area fly-ins were well supported by EAA Chapter 245 members in early June 1988 with St Lazare, Embrun/Russell and Cobden all welcoming hungry breakfasters on the same day.

On June 17th, 1988 the National Aviation Museum was officially opened by Governor General Jeanne Sauve and the next day Rockcliffe flying club held a Fly-

in Breakfast and provided bus transportation to and from the Museum in honour of the museum's opening. Jim Bradley in his red and white Davis, Andy Douma in his Jodel, Charles Martel in his 2+2 Sportsman, Doug Richardson with his Zenith and Eric Tadaa and Irving Sloan, sporting helmets and leather

jackets in the Pietenpol were present.

The Cornwall Flying Club held their breakfast on the next weekend. Doug Richardson and Rodney Stead attended that one, as did Olav and Nina Peterson in their Cessna.

Hopefully, over the summer, more vintage Carb Heat Newsletters will surface and I will

add them to our digital collection so they can be re-presented for all

to enjoy.
Wayne Griese

EXHAUST – from the Carb Heat Archives 20 YEARS AGO July 1988

EAA Chapter 245, it was reported, had a good display at the July, 1988, Carp Air Show although the sweltering heat kept the crowds down. Drywall for the club hanger was acquired and the walls and ceiling were covered during that month. Also in the news was the approval by Transport Canada for the building of a row of hangars. Township

approval and a building permit were still required before construction could start.

ELT's were discussed at the monthly meeting with Mr. Eric Maule, president of Canadian Airmotive, talking about the current state of affairs from a dealers point of view and some of the problems being encountered by ELT owners. Members were

advised that although a new generation of encoding ELT's is on the way and that the new system will operate on a different frequency and will send encoded digital location and unit signature information to a series of satellites, they should not be expected for another ten years.

Wayne Griese

Can you help fill in the white blanks? I have the grey issues. I'm looking for old issues of Carb Heat for our Archives. Please contact Wayne Griese at 613-256-5439 or wayner@igs.net.
