Member Project Updates

Each month, we take a minute to review the projects our members are working on. It's very interesting to hear. Please come join the discussion and update the team on how you are progressing on your project.

AROUND THE AIRPORT 45G

- Saturday morning breakfast

Breakfast is served at the BAA House, on Hyne Road, every Saturday morning at 9:00am.

- Pilot Proficiency Night

Each Monday evening a new topic is discussed at the BAA House in a relaxed format. This Monday will target engine crankcase issues.

HAPPY NEW YEAR

Well, we've survived another year just a little rough for the wear. This is the time to get to the hangar and take care of some of those maintenance items that you've been putting off so you, and the aircraft, will be ready for spring flying. In addition, I am including some information that was passed along by Charlie Becker from National on upcoming workshops in January. Take a few minutes to review the schedule and plug yourself into one of the web workshops. Let's have a great year.

WE HAVE HEAT IN THE HANGAR

We have heat in our EAA hangar much thanks to Mark Luscomb and David Yegge for moving the existing furnace to the West side of the hangar and venting it out the old original vent pipe.

Your 2023 chapter dues (\$25.00) are due NOW, January, so please get with Ron and make your 2023 dues payment. Thanks

Homebuilders Week – Online Event Starts January 23

An online opportunity to learn about all aspects of building your own aircraft

By Charlie Becker, EAA Homebuilt Community Manager

EAA will be hosting our third annual Homebuilders Week online learning event for aircraft builders: (www.EAA.org/HomebuildersWeek). It will be five straight days of educational forums covering a broad spectrum of aircraft building topics. It will start on Monday, January 23, 2023, and run until Friday, January 27, 2023. The live online presentations will be open to everyone interested in building their own aircraft. Sessions will start at 11:30 a.m. CST and run until 8:30 p.m. CST daily.

This event is an opportunity for a new person to jump in with both feet and learn a lot about the wonderful world of homebuilding. We will cover areas like getting started successfully and techniques when building with sheet metal, composites, steel, and wood. But it won't be just for the newbie; we are offering in-depth talks on panel planning, engine selection, FAA certification, flight testing, and selling a homebuilt aircraft. There will be something for every builder, whether you are just starting out, knee deep in a project, or just received your airworthiness certificate — it is going to be a great learning opportunity.

EAA is working with industry experts, kit manufacturers, and other subject matter experts to provide top-notch material for builders. The sessions will be live and allow time for attendee questions. Recordings will be archived and available to EAA members for review.

EAA Homebuilders Week coincides with the 70th anniversary of the founding of the Experimental Aircraft Association in 1953. Those founding members of EAA lit the fuse on the homebuilt movement that provides affordable access to aircraft ownership and today has spread worldwide.

EAA Homebuilders Week is possible through the generous sponsorships of Aircraft Spruce & Specialty Co., Dynon, Scheme Designers, Inc., and Van's Aircraft, Inc.

Visit EAA.org/HomebuildersWeek to review the schedule and sign up for a session.
