

THE JEFFCO AIRPORT

FREQUENT FLYER

Volume II, Issue I

March 1990

Plans Underway for 1990 Rocky Mountain Air Rendezvous

Preparations for the 1990 Rocky Mountain Air Rendezvous, scheduled for September 15 and 16 at Jeffco Airport are underway.

On January 24, the United States Navy Flight Demonstration Team - The Blue Angels - arrived at Jeffco Airport for their pre-season visit. Local dignitaries welcomed pilots Lt. John Foley and Lt. Bruce Dillard who met with airport officials, the FAA and the promoter to plan the biggest airshow ever to come to the Denver area.

The U.S. Navy Jet Demonstration Team will perform in the McDonnell Douglas, F/A-18 Hornet, the Navy's newest Fighter/Attack Aircraft now assigned to both Naval and Marine Aviators.

Also scheduled to perform is the legendary Robert (Bob) Hoover who will demonstrate two separate aircrafts. The Sabreliner Business Jet will perform a number of safe, yet typically unseen "unusual" flight configurations. Bob will also bring his famous Rockwell Shrike Commander, a twin engine business aircraft in which he'll simulate a single-engine out, one wheel landing.

Colorado's own Coor's Silver Bullet Jet, the world's smallest demonstration jet aircraft piloted by Kathy Gray, will perform as well as Team America, a three aircraft formation team which will

The Blue Angels are scheduled to perform in the 1990 Rocky Mountain Air Rendezvous at Jeffco Airport.

demonstrate special maneuvers using its special smoke system for visual impact. The Red Knight, a custom modified T-33 Fighter Jet from the Korean War era and piloted by Rick Brickert will perform dramatic flight maneuvers. Sean Tucker of Salinas, CA will demonstrate the capabilities of the famous Pitts S-2 aerobatic biplane.

Les Shockley and his Shockwave Truck will return for another

"ground pounding" demonstration of his 200 MPH truck with three Westinghouse Jet Engines.

If you would like more information, or are interested in volunteering, please call (303) 424-7766.

The Manager's Message...

Customers Top Priority for 1990

The Jeffco Airport Authority and staff dedicated last year as "The Year of the Customer". That goal has been carried into 1990 because we feel that you, our customer, are the most important ingredient to the success of the airport.

In 1990 we are dedicated to bringing you the best service possible. Plans for this coming year include building more executive hangars and developing additional property for more hangars. The VOR is being considered by the FAA for Jeffco Airport. Jeffco Airport continues to offer competitive fuel rates and tie-down rates as low as \$30 per month.

The airport staff is committed to making the airport a safe and pleasant experience for all of our customers. The maintenance crew has done an exceptional job at snow removal, and they are always happy to respond to any special requests you may have.

If you ever have any questions or comments about our services, please contact me directly or one of our staff members. We are always happy to help.

Dave Gordon
Airport Manager

Airport/Businesses Take Team Approach to Marketing

Jeffco Airport has teamed up with airport businesses to market the airport. Rinehart, Henry & McKee, Inc., a local advertising and public relations agency met with airport businesses in December to determine their needs, and then developed a year long calendar of events to support those needs. All aviation related businesses are participating in the joint program.

This newsletter is the first of four to feature either maintenance shops, FBO's, flying schools or other services provided by airport businesses. "We want to make aviators across the front range aware of the variety of services offered at the airport," said Dave Gordon, Airport Manager.

The agency developed advertising for the airport in 1989 and will continue to assist the airport with public relations and other advertising activities.

Deli Serves Up Homestyle Cooking

Bill and Stella Fletcher, owners of Flying Deli Delights, pride their business on homestyle, home-made foods. They opened the deli a year ago in Hangar B-8 and serve customers in the restaurant and will also deliver food to businesses on the airport, as well as providing catering services for local businesses.

"I grew up on a farm in Ohio with ten children in the family, so I learned how to cook at a young age," said Stella Fletcher. She continues to bake fresh pies and sweet rolls as well as soups and her special sausage gravy and biscuits. Stella added that people fly in from Cheyenne, Grand Junction and Colorado Springs to feast on the breakfast burrito.

The Fletcher's decided to buy the deli after their son told them about the opportunity at Jeffco Airport. He had worked for Rocky Mountain Piper as a chief pilot and knew that many pilots and airport employees had to go into Broomfield to eat.

According to the Fletcher's the warm, cozy atmosphere, fast service and homestyle food keep their customers coming back. You can reach the deli at (303) 460-9079.

Airport Construction Projects Updated

Grants from the FAA have allowed for many improvements at Jeffco Airport. There are several drainage projects underway and are scheduled to be completed by spring. Construction will continue in the spring to complete overlaying the north FBO ramp areas, including the new Turbo West Hangar 4 and the Denver Air Center ramp areas.

During the summer months runway 29L and taxiway Bravo will be overlayed and the airport beacon will be relocated. An Environmental Study is underway for replacing 29L to make it longer, wider and lighted. This will provide the airport a secondary runway during adverse weather conditions and airport emergencies.

Airport Maintenance Shops Provide Quality Service for Aircraft

Turbo West

Turbo West has been in business for 15 years offering aircraft sales and service. The company has 35 mechanics on staff, averaging nine years experience, and can serve your needs 24-hours a day, 7 days a week.

Although they specialize in turbo prop, jet engines and helicopters, they also service single and twin engine piston engines. "Until 1986 we were a Piper dealer, and we continue to do maintenance on that type of craft," said Gene Langfeldt, Vice President at Turbo West.

The maintenance facility itself is broken down into specific areas of expertise. For example, Turbo West specializes in turbine engine "hot section" overhauls, and has 10 technicians manning the avionic bench testing and installation as well as parts and component overhauls, accessory repair. Turbo West also repairs smaller engine motor items within an aircraft system.

"We have also developed an Advanced Maintenance Concept Program which is a computerized trend monitor for corporate aircraft engines," said Gene. The system provides an advanced warning of engine deterioration and allows the mechanics to compare the performance of certain engines. "It's a benefit to the pilot because we can detect and correct engine problems before they become a major repair job, and it also allows the pilot extra safety," added Gene. Also, pilots buying an aircraft can have the engine tested with this system to determine any problems.

For more information contact Turbo West at (303) 469-6671.

Denver Air Center

Denver Air Center was formed in 1982 as a continuation of the old Roach Aircraft. This large facility has been in the same location for over 28 years. They offer the most varied services of all the operators at Jeffco with aircraft sales, a large full service flight school, a large flying club, the lowest fuel prices on the field, a full service maintenance shop and a large parts department. Also Freedom Avionics is co-located in this facility.

The maintenance facility has six full time A&P mechanics that work primarily on piston engine aircraft. Most work is flat rated and all operations from minor engine and airframe repair to major engine overhauls are accepted. In addition, Denver Air Center attempts to repair parts before turning to costly replacement. The goal of all maintenance work is "Out on time, on budget and done right the first time". Normal business hours and weekends by appointment.

Denver Air Center is open seven days a week, 8-6. Just look for the large brown hangar as you come onto the airport. For more information, contact Denver Air Center at (303) 466-2336.

Executive Air Maintenance

Ben Watkins opened Executive Air Maintenance at Jeffco Airport three years ago and specializes in single and twin engine aircraft. Executive Air Maintenance has four full-time mechanics on staff.

Ben began his aviation career in 1973 as a Helicopter Crew Chief/Mechanic for the U.S. Army. He furthered his education at Colorado Aero Tech, graduated in 1978, and has been active in general aviation since then.

Executive Air Maintenance has built their reputation on safety, reliability and honesty. "When an aircraft leaves my shop it must be mechanically perfect" Ben emphasizes. "It is important to me that the owner feels satisfied with the maintenance that has been performed on his aircraft."

Executive Air Maintenance is located at hangar B-11-D, east of hangar B-8 (formerly Beechcraft's hangar). Executive Air Maintenance is open Monday through Friday from 8am-5pm, and they can be reached at (303) 466-3771.

Windsong Aviation, Inc.

Rod Tipton of Windsong Aviation, Inc., formerly Hoffman Pilot Center Maintenance, opened his doors to Jeffco Airport pilots in 1987. The company specializes in the maintenance and repair of high performance single and multi-engine aircraft. Windsong Aviation also has expertise with turbine and piston engine helicopters, and handles the maintenance for the KOA Radio helicopter.

Windsong Aviation has three mechanics on staff, with over 50 years of combined experience. "We work on aircraft ranging from general aviation up to 12500 pounds and do airframe maintenance and repair as well as engine repair and overhauls," said Rod. "We believe the work should be done expediently, as we don't have a large storage area for planes waiting to be repaired," Rod added.

After completing his education at Northrop Institute of Technology in California Rod began working at Jeffco Airport in 1968 in various capacities for Aircraftco and Roach Aircraft. In 1975 he went to work for Frontier Airlines repairing turbo prop and jets until the demise of the airline. Rod then returned to Jeffco Airport as Director of Maintenance for Hoffman Pilot Center. "I would like to get into working on turbo prop and jet engines at Windsong" said Rod.

Windsong Aviation is open Mon-Fri from 8-5 and on weekends by appointment. They can be reached at (303) 469-5858.

Just The Facts . . .

First Aid Course

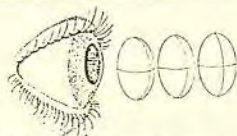

A standard first aid course will be offered on March 17 and 24 from 2:00 - 6:00 p.m. The course, taught by the Mile High Chapter of the Red Cross, will be held in the upstairs conference room of Hangar B-8. Course cost, including all materials, is \$40.00. Please contact the AirWest Flying Club at 466-1718 to register.

Conference Facilities Available

Hangar B-8 now has conference facilities available for meetings. Please call Sue Hess at 465-5984 for more information.

Storage Rooms Available

Storage space in various sizes is available for rental. Please contact Traci Lutz at 466-2314 for more information.

Orthokeratology Improvement of Uncorrected Vision to Enhance Pilot Qualifications

Twenty Years of Specialized Vision Services for Pilots,
Including:

- Qualification for medical certificates
- Qualification both with/without waivers
- Assistance to pilots' attorneys
- Service for expert witness testimony
- Author of the classic textbook, *Guide to Pilots' Vision*
