JANUARY 2024

Chapter 50 releases 2024 Calendar of Events

**January 20, 2024
(Sat.) Toledo Express
ATC Tour 12:00 am**

We will be touring the TRACON & Control Towers at Toledo Express Airport. For those wishing to Carpool, meet at Hinde Airport at 10:00. Pre-Registration for this event is required, contact Tracy Hille @ (419) 624-6243 (deadline 1-16-24) You must provide your Driver's License number during pre-registration. (Sorry, no Foreign Nationals permitted.) Continued next page

From the Vice President

I hope this newsletter finds you well and enjoying the new Year.

Hopefully everyone received a mailing from the Chapter containing the 2024 Events Schedule. If you didn't get the mailing, we may not have your mail address; please call me so we get it corrected.

We're off to a good start for the 2024 Chapter Events this month with our Tour of the Toledo TRACON and ATC facility on Jan 20th. If you are interested in attending, you must contact me before the 16th and register.

We finalized our Elections in December, but since then our President Steve Risner has had to back away because of work and family priorities. This open position will be discussed during the January Board Meeting on 17th.

We also want to establish some additional Committee positions to assist in some key programs for the Chapter. We'd like to establish a "Flying Activities Committee", a "Young Eagle

Feb. 10, 2024 (Sat.)**Federal Aerospace****Institute Tour 11:00 am**

FAI is an Aircraft Maintenance Technician (AMT) school based at Toledo Express Airport training students for their Airframe & Power plant (A&P) certifications. We will be touring their facility and be learning about their School. Pre-Registration for this event is required, contact Tracy Hille @ (419) 624-6243 (deadline 2-7-24). Carpool option same as above, meet at 9:00 am.

March 16, 2024**(Sat.) ForeFlight Training**

- J. Colvin 8:00 am

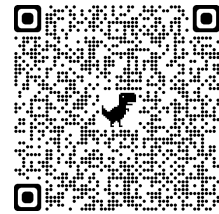

Bring your devices with ForeFlight to Hinde Field and be prepared to spend a full day learning about flight planning, weight & balance and weather monitoring using the powerful ForeFlight software.

Committee” and a “Scholarship Committee.” We would really appreciate your assistance in these vital Chapter objectives. If you would like to assist us, please reach out to me and participate in making our organization successful.

On Wednesday Jan 10th, I participated in a Webinar that was sponsored by EAA and the FAAST Safety Team. The topic was “Tips to Preheat your Aircraft”. It was packed with Pre-heating tips, suggestions and even how to fabricate you our heater system. To see the presentation, use your phone (in camera mode) scan the attached QR barcode.

Cheers –
Tracy Hille

July 22 – 26, 2024

Airventure All Week

August TBD

(Suggestions welcome)

September 14, 2024

(Sat.) Galloway Chili Fly-In 11:30am

December 1, EAA 50 Wassail & Hors d'oeuvre Christmas Event

On December 1, Chapter 50 held its second annual Christmas event at the Hinde Field Gathering room. The event was a great success as 50+ members attended. The Gathering Room, EAA shop, and Fire Pit were used to accommodate the guests. The food and weather were excellent and the conversations great.

October 5, 2024 (Sat.)
Octoberfest Fly In Hinde
Field

11:30 am

November 22, 2024

Banquet TBA

5:30 pm

December 6, 2024

(Fri.) Wassail & Hors
d'oeuvres 5:30pm

New EAA 50 Tools

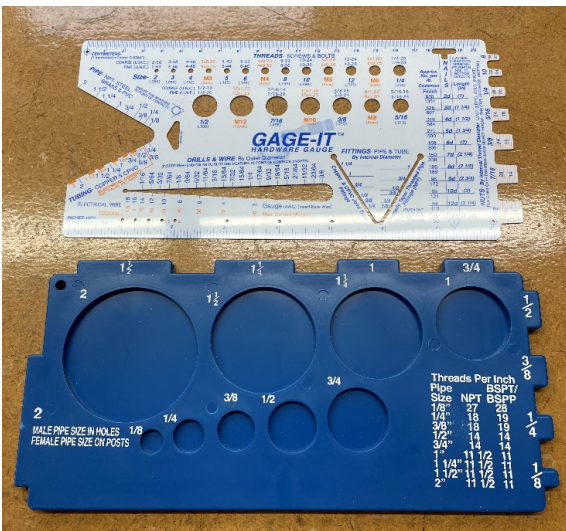

1. Male/Female Screw Size Gages

- Used to identify a screw or bolt size.
- Has male & female threads.

2. Pipe ID/OD Gage & Bolt size Gage.

- Identifies Pipe size by ID or OD.
- Identifies pipe fitting sizes.
- Identifies bolt sized by diameter.

News From Hinde Field

Winter flying information:

1. Check for notams. The runway does not dry as quickly due to less sun and shorter days.
2. Please avoid driving or parking vehicles on the lawns.
3. The lights will not be turned on daily. If you need lights call Scott Bores at 419-503-3531
4. The south taxi-way is closed during the Winter season. Do not enter this area from any point as it is very soft in different spots.

New Roof on Hangar 20

It took the builders just four hours to install a new roof on hangar 20 which is a 50 x 60 building. It was amazing watching these guys work.

Mystery Solved

The remote for the Gathering Room monitor disappeared after the Dec. 1 Christmas event. It was not in the trash, couch cushions, decoration boxes, or any place I looked. I called in sleuth Tracy Hille and after an exhaustive search, one month later Tracy found the remote in a locked cabinet on the top shelf...Hmmm Christmas elves?

3.Thread Pitch Gages.

- Determines a fastener or Pipe threads per inch (TPI) using these gages.
- English or Metric

4. ANCHOR NUT DRILL TOOLS

Chapter 50 has received a donation from Rolland Drown of an extensive set of Anchor Nut Hand Drill Jigs. These are available in the Green Tool Cabinet at the Chapter workshop.

For a list of the tools that are available see page 8.

Submitted by Tim Stienbauer

The main reason I wanted my ppl and an amphibious plane, was to visit the family property in the Northern Lower Peninsula of Michigan. Ossineke, to be exact, is about a 2 hr flight from Hinde Field. Sure beats driving for 6 hours and dealing with Michigan traffic!

Upcoming EAA 50 Educational Event

EAA 50 FEBRUARY EDUCATIONAL EVENT

Federal Aerospace Institute Tour

Feb. 10, 2024 (Sat.)
Federal Aerospace Institute Tour
11:00 am

FAI is an Aircraft Maintenance Technician (AMT) school based at Toledo Express Airport training students for their Airframe & Power plant (A&P) certifications. We will

be touring their facility and learn about their School. Pre-Registration for this event is required, contact Tracy Hille @ (419) 624-6243 (deadline 2-7-24). For a carpool option meet at 9:00 am at Hinde Field. (Advise if you are willing to be a car pool driver)

Georgia "Tiny" Broadwick was the first woman to jump from an airplane.

Between 1913 and 1922 she completed over 1,100 jumps. She invented the ripcord and is the only female member of the Early Birds of Aviation. In 1914, she demonstrated parachutes to the U.S. Army, which at the time had a small, hazard-prone fleet of aircraft. The Army, reluctant at first to adopt the parachute, watched as Tiny dropped from the sky. On one of her demonstration jumps, the static line became entangled in the tail assembly of the aircraft, so for her next jump she cut off the static line and deployed her chute manually, thus becoming the first person to jump free-fall. This demonstrated that pilots could escape aircraft by using what was later called a ripcord.
