President's Message

Greeting fellow chapter members,

April is here, bringing with it the hope for better and warmer weather!

Our chapter has once again been selected to award a Ray Scholarship. This is a an \$11,000 scholarship for a 16 to 18 year old interested in pursuing their pilot certificate. It is part of our mission to promote aviation, and we are looking for potential candidates to join our previous scholarship awardees. We even had a couple of Eagle flights!

The Rans is ready for sale at \$19,500, and we look forward to selling a fine aircraft to a new owner.

Our annual banquet is going to be held on June 1st at Brewer's Alley in Frederick, and I look forward to seeing everyone that signed up. It will be nice sitting down to a fine plated dinner again with the chapter members.

Thank you for for your support, and hope to see you around the airport soon.

Exciting Episode at the FDK Self-Refueling Area

I had just grounded my plane, pulled the refueling hose out to the outboard fuel cap and was returning to turn on the refueling pump when my hat departed my head with a mighty gust of wind. I turned 90 degrees to see what but noticed my RV-9 was rolling uphill at me! I put both hands on the fuel tank and struck my best down lineman pose, when the wind stopped. Whew!

Low and behold, a Marine Apache Attack helicopter had just been marshaled onto a parking spot, about two main rotor diameters away from the refueling pad. My tip-up canopy was now open and the refueling hose was now 3 feet behind my main wheels. The canopy gas struts did their job.

As the Apache Aircraft Commander rounded the tail rotor during his post flight inspection, I signaled him to come over. He asked the usual, "what can I do for you Sir". I smiled and pointed at the refueling hose and told him it was 3 feet in front of the RV-9 before he blew me past it. He said oh, ah...

I said no metal was bent and I'm sure you didn't see me among all the other schoolhouse planes and a NetJet parked close by. I told him to take care, he complimented me on my plane, and I completed fueling the plane.

Signature responded to my email description with a " thank you, we'll do better and maybe move the helicopter down a bit, when there is an aircraft in the self fueling area."

For my part, I think I will pull into the self-serve from C and either exit north, south or do a 180, depending on space. I returned later and found my hat in the tall grass next to self-serve tank.
