President's Message

So, what is your favorite season to fly? Mine is the Fall, but Spring has a special place in my heart as well. While Maryland can be foggy and rainy in the Spring, when the weather cooperates you can see some amazing things. I did my Private Certificate training at Tipton Airport, which is bordered on the south by a large nature preserve. One day in March or early April, there was some slight fog in the trees next to the runway, but it was clear at the airport and above the tree line. As we took off and rose through 50 feet AGL, I could see on our left the top of the trees. The tops were covered with a light green; new growth that you could not see from below.

That is one of my favorite things about Aviation. It gives you a fresh perspective on the world. A new way of seeing things.

I hope all of you are having a good Spring and staying safe. I am encouraged to hear that many people have received a COVID vaccination. If things continue to improve, we will open the Chapter Hangar around 2 pm on April 17th. Tables and chairs will be available outside the hangar, so bring a drink and a sandwich and watch some planes take off and land. There will be plenty of room to continue to social distance. If you have a plane that you want to show-off, bring that as well.

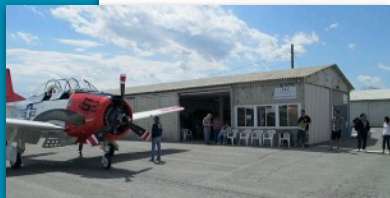

One of our Chapter members was asking about having a group campsite at Airventure this year. What do you think? Are you planning to go to Airventure? Would you be interested in having a Chapter campsite this year? Please let me know.

Also, our Chapter has again been chosen to offer a scholarship (The Ray Foundation Aviation Scholarship) to a teenage so they may earn their Private Pilot Certificate. Details will follow, but please let me know if you know someone that might be interested.

Oh, and of course the correct answer to the question about the favorite season to fly... any season.

Take care everyone,
Chris
President

[C&L Aviation Services launches maintenance apprenticeship program](#)

Article by Jason Holland / March 08, 2021

Regional and corporate MRO (maintenance, repair and overhaul) C&L Aviation Services has formally begun an aircraft maintenance apprenticeship programme.

The three-year programme is registered with the US Department of Labor and will provide paying jobs to apprentices while they receive on-the-job instruction, preparing them for their FAA certification examination and a career in aviation . . .

[The inside look at apprentice training](#)

Article by Paul E. Eden / December 18, 2019

With an industry shortage of qualified engineers, apprentice training is every bit as important as ongoing instruction. Paul E Eden takes a look at the training schemes of Marshall Aerospace and Defence Group, Monarch Aircraft Engineering Limited and Swiss-AS.

Training is key to any safety-critical industry, particularly one as regulated and exacting as aerospace. Factor in the pace of development, particularly in IT systems, on the aircraft and in the maintenance hangar, and engineer or technician training becomes a substantial task for even the smallest MRO . . .

EAA Chapter 524 - Selected for Ray Aviation Scholarship Funding

Scholar Eligibility and Requirements

Ray Aviation Scholarship Fund applicants will be the most engaged, excited, and motivated aspiring pilots the chapter has had the pleasure of meeting. It will be incumbent upon the chapter to vet local youths to help bring forward the most deserving candidate in their local area.

Local candidates must meet the following criteria:

- Age 16-19 for powered flight training.
- Possession of a student pilot certificate.
- Possession of FAA medical certificate. (private pilot students)
- Be able to begin flight training within 60 days of receiving the award.

Additional consideration will be given to candidates who are former Young Eagles, EAA student members, and actively participating in the EAA Flight Plan, specifically the Sporty's Learn to Fly Course.

**Know of a youth who may be interested?
More information coming soon.**

Meeting Minutes

04 Mar 2021

Meeting called to order at 7:03 p.m. by Chris Gunther

- Chris Gunther reported that Dean Stickell heard that we were selected for the Ray Aviation Scholarship. We have until October to put forward a candidate.
- Neil Dickinson - Working on fuel lines and sight glass for fuel level. Will pull the wings off this weekend to finish riveting the top skin.
- Derek Vento talked about his experiences as a controller and how to better work with ATC and fly more safely.

Meeting adjourned at 8:16 p.m.
Submitted,
Erick Webb, Secretary

Board Meeting Minutes

11 Mar 2021

Chris Gunther, Mark Pankratz, Larry Jarkey, Rex Bullinger, Tom Comeau, Mary Ann Alvarado, Erick Webb, Mark Gosselin, Dean Stickell, Ernie O'Roark

Brought to order at 7:00 p.m. by Chris Gunther

- We will set May as a good target for choosing a scholarship recipient to give them the best chance at the best weather to get as much training as possible. Recommend each applicant submit a 250 word essay and participate in an interview, at minimum.
- Possibility for outdoor picnic at (outside) Chapter hangar on April 17 at 2:00 p.m. Most of the board has gotten (or is in the process of receiving) their vaccinations. Steve Gross should have the RV-10 out of the hangar in March (It'll go for panel installation in early April), so there should be space. Everyone will bring their own food to keep risk of spreading COVID low.
- Mark G. reported that Doreen has been in touch with Robert Finn (deputy chief of veteran's affairs in MD) to get him to the Chapter hangar on a Saturday. He wants to visit and see what the Chapter is all about and then start building up the program with disabled veterans. The kit should arrive sometime in May.
- Mark P. - Brent Connelly (RV-12) is big into aviation videography and will talk about equipment, how-to, etc. Put a smoke system on his airplane and needs a new weight/balance. EAA has a Tool Crib program that we could apply for to get help buying certain tools/equipment. Scale and prop balancer are two in particular that the Chapter might be able to put to use. Because the program only covers ~30% of the cost and funds aren't coming in for workshops and special programs (Ford, B-17, etc.), now may not be the best time.
- Mark G. asked if the Chapter was considering doing a group campground like we did a couple years ago. Chris will lay out a potential plan and submit to Mary Ann for inclusion in the newsletter to gauge Chapter interest.
- Erick may miss next month's board meeting (will be at SUN 'n FUN).

Meeting adjourned 7:27 p.m.
Submitted, Erick Webb, Secretary

Women's History Month

The Ninety-Nines, Inc, International Organization of Women Pilots
March 8 at 12:55 PM · 🌐

WOMEN'S HISTORY MONTH: WOMEN IN AEROSPACE!

March is Women's History Month and is a time when we recognize the contributions of women in American history.

Through years of activism and an unwavering commitment to women, the National Women's History Project successfully lobbied Congress to recognize Women's History Month. The result was Public Law 100-9 on March 12, 1987. This law requested the president to issue a proclamation, which encouraged U.S. citizens to observe Women's History Month with appropriate observance activities. President Ronald Reagan then issued Presidential Proclamation 5619 proclaiming March 1987 as "Women's History Month" to honor the achievements of American women."

During wartime, women were vital in their roles of support and service as nurses, seamstresses, cooks and informants, alongside their male counterparts.

In 1948, Congress passed the Women's Armed Services Integration Act, which granted women the right to serve as permanent, regular members of the Army, Navy, Marine Corps, and the recently formed Air Force.

In 2020, recognition of the 75th Anniversary of World War II, the Department of Defense acknowledged the contributions and sacrifices made by service members, as well as those who served the home front.

Steel Eagles

Elizabeth L. Remba Gardner, of Rockford, Illinois, Class 43-W-6 WASP (Women Airforce Service Pilot) at the controls of a Martin B-26 'Marauder' medium bomber. Harlingen Army Air Field, Texas. 1943 (Aged 22)

About Me and My Experiences

"My name is Elizabeth L. Gardner, or for short, Libby Gardner. I am a pilot for the Women Aircraft Service Planes. a.k.a. WASP, which is considered a civil service. Before the war, I was a housewife and a mother who stayed home to take care of my family. I was called to duty when the war started to learn how to test planes, instruct pilots, tow targets used for anti-aircraft artillery practice, and assemble planes. I was grateful for the opportunity because it made my childhood dreams of flying and fascinations with planes a reality. I work 7 days out of the week and some of those days happen to be better than others. When I first started learning, I was eager and nervous and also had two days of training under Lieutenant Col. Paul Tibbets who later commanded the B-29 that dropped the first atom bomb on Hiroshima. The training consisted of three phases; primary, basic, and advanced. On the days that we have check rides, a lot of pressure can be put on us women, and we feel that we must make a name for ourselves in this industry. I had a check ride the other day, and I must say that things did not go so well for me that day. The man testing me was very quiet and sarcastic and did not give me much information or say a lot to let me know how I was doing. I would make mistakes as turning to far out or using too much rudder on the turns; I did my best to relax, but his sarcastic remarks did not make it easy and different items in my performance were still sloppy including my stalls. The only good thing that came from that test was my landing; it was possible that he would give me credit for that, but instead he stepped out of the airplane without saying a word about whether or not I passed. I held back my tears. The opportunity is wonderful, and I love doing this every day.

RV-10 Progress Report

More of our members are getting vaccinated for Covid -19 and the relief is palpable. Some of our youths are returning to the build, as well as some new faces.

Grab a friend or family member and bring them by the hangar. Thursday night, 6-9pm, and Saturday mornings, 9am - 12pm, are the usual build days and time.

As always, grab a mask and come join in the fun. There is always something to do and more to learn. Keep up to date on the [MeetUp App](#) or go to the Event Calendar on the [FAA Chapter 524](#) website.

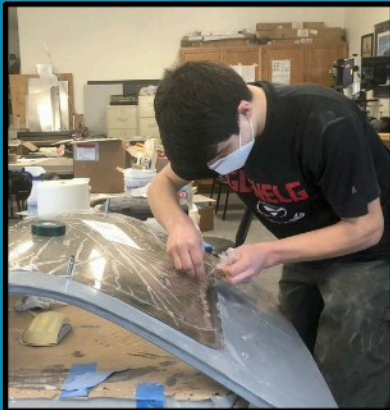

Hope to see you there when next they meet.

LIGHTSPEED Survival Gear Contest

Grand Prize Winner - Jason Moody

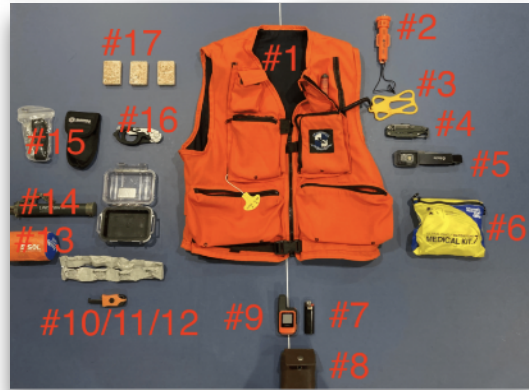

Jason received high marks from our judge panel on accessibility, water purification, and his selection of vest. One judge commented, "Amazing survival preparedness!"

Second Place Winner - Pedro Fonseca

Pedro received high praise for his presentation, and one judge comment was, "The wet wipes are a good addition! I haven't thought of that."

Third Place Winner - Noah Alexander

Judges gave high praise for his personal floatation device vest and speaking towards the topic of training. Judges remarked, "A well-considered approach!" and "A top contender!"

Free Young Eagles Flights

An EAA Student Membership sponsored by *Embry Riddle* is available **FREE** of charge to any young person age 8 - 18 and 6 months who has completed a Young Eagles flight. A Young Eagles flight is just the beginning to exciting experiences in aviation and is free!

Visit YoungEagles.org/join and enter the unique code that came with your logbook to activate your **FREE EAA Student Membership** sponsored by Embry Riddle.

NOTE: If you are a current EAA member and are logged into the website, please log out prior to signing up for a student membership. Then click the 'Join EAA' button in the 'Membership' dropdown menu, and navigate to the Student tab on the form.

YOUR MEMBERSHIP INCLUDES:

- FREE access to Sporty's Learn to Fly Course (\$249 value).
- FREE access to EAA Virtual Flight Academy - Stage One: Fundamentals of Flight (\$29.95 value).
- FREE first flight lesson* (\$130 value).
- FREE admission to 400+ science and technology museums.
- FREE Academy of Model Aeronautics Student Membership.
- FREE Soaring Society of America Cadet Membership.
- FREE electronic copy of *EAA Sport Aviation magazine*.
- Access to valuable flight training awards, education scholarships, and Air Academy camperships.

**Upon completion of the first three volumes of the Sporty's Learn to Fly Course*

Aviation Activities for Youth

EAA Chapter members and teachers are working with students of all ages to excite them about aviation. EAA's Aviation Activities for Youth provides a compilation of successful activities that have been used around the country. Input for this guide came from EAA chapter leaders and Young Eagle coordinators, current activities featured at the EAA AirVenture Museum and the EAA Air Academy with additional programs submitted by teachers and other aviation organizations. Activities are arranged in age-specific groups to assist you in selecting an activity to match your audience.

In addition to activities, you will also find suggestions on how to incorporate new activities to your Young Eagle events and how to make an effective presentation at a local school.

If you have suggestions on how to improve an activity, or if you have an additional activity that should be included in this reference, please contact us at youngeagles@eaa.org.

Categories include:

- Elementary Activities
- Middle School Activities
- High School Activities
- Sample Young Eagle Activities
- Presenting at Schools
- Young Eagles Enrichment
- Elementary Curricular Material
- Middle School Curricular Resources
- High School Curricular Activities
- Additional Resources

Vintage News

Washington County, MD, Historical Society

In this vintage photograph dated 1942/8/20 a man is affixing a radio antenna to a Fairchild XAT-13. Built by Hagerstown's own Fairchild Aircraft, the XAT-13 had a single machine gun in the nose, and a top turret with twin machine guns.

Founded in 1925 by Sherman Fairchild, Fairchild Aviation moved to Hagerstown in 1931. Prior to World War II, Fairchild Aircraft was contracted by the United States government to take aerial photographic surveys of the US in order to track soil erosion. During World War II, Fairchild Aviation produced countless planes for the war effort. Today, the Hagerstown Aviation Museum seeks to preserve Hagerstown's rich aviation history. #flashbackFriday

*** HOMEBUILDERS WEBINAR SERIES

Frederick VMC Club

IMC Club meets: third Monday of each month, 7:00 p.m.

Location: Chapter 524 Aviation Education Center/Hangar, Frederick Municipal Airport

With the success of the IMC Club, EAA 524 is now forming a VMC Club, oriented toward primarily VFR pilots of all experience levels.

The VMC Club will meet on the third Monday of each month, the day before the IMC Club meets. The VMC Club offers monthly meetings in which pilots can network and share knowledge and experience. The meetings use real-world scenarios to engage members, and allow a free exchange of information that improves awareness and skills.

Because of current restrictions, we will meet via Zoom until we can get back into the Chapter Aviation Education Center. You can register for the inaugural VMC Club Meeting here: <https://bit.ly/3iJEb47>

Frederick IMC Club

IMC Club meets: third Tuesday of each month, 7:00 p.m.

Location: Chapter 524 Aviation Education Center/Hangar, Frederick Municipal Airport

Interested in learning more about IFR flying? Scenario-based discussions are available here.

A community of pilots willing to share information, provide recognition, foster communications, promote safety, and build proficiency in instrument flying. IMC Club chapters offer monthly meetings in which pilots can network and share knowledge and experiences.

More information about the club and its mission can be found on our website at <https://chapters.eaa.org/ea524/imc-club>
