

EAA Chapter 538 in Phoenix, AZ is offering a complete Sonex kit project for sale including new engine and prop.

Project includes:

- Complete Sonex legacy "A" model in conventional gear (S/N #1344) with dual stick configuration. Project has always been in the Phoenix Area.
- Complete Sonex plan set (S/N #1344).
- NEW (in 2009) Jabiru 3300 engine with accessories, including carb, exhaust and air filter. Engine still pickled and wrapped in original shipping crate (S/N 33A-2055).
- Baffle kit for the Jabiru 3300.
- NEW Sensenich wood prop sized/pitched for Jabiru engine.
- Builders log and all literature for the kit. This includes several informational CD's.

Project completion:

- Pictures in link below show current state of the build. Work is exceptional by original builder.
- Emp, ailerons, flaps complete.
- Rolling fuselage with Jabiru engine mount at approx. 85% complete.
- Wing spars have been started. This is where work stops.
- Canopy untouched.

Reason for selling:

EAA Chapter 538 is reluctant to sell as this was planned as a membership / youth build project in our new hangar. Times have been taxing and cost high so we are selling to help complete the hangar build.

Pictures can be viewed at <https://photos.app.goo.gl/nUKum3YUFmhHjuSH6>.

Asking price:

\$23,500 - ***Please be advised that this is a package deal. We will not part it out so please do not ask.***
