PRESIDENTS JANUARY 2022 REPORT

Welcome EAA Chapter 538 members, family and friends.

2022 is finally here and with this new year begins with the promise of new and exciting things to come. Soon we will begin building our chapter hangar and when that begins, all sorts of new and exciting things become possible. Our hangar will have space available to build or finish your project. Need tools? We will have a selection of tools that most people would not have available, such as a brake and shear, band saw, drill press, table saw, rivet tools and many others. As we continue to receive donations we expect to have many other items as well. We have a large assortment of work benches and cabinets, perfect to set up your own work station.

There are other things as well. I plan to celebrate the opening of our hangar with a barbeque dinner and then having these dinners or burger BBQ s as a regular part of our chapter activities. Imagine an evening meeting night that begins with a potluck, burgers and social hour before the meeting begins. Should we meet on the weekends how about begin with a pancake breakfast before the meeting. Let us advertise our events in order for other chapters and flying groups use it as an excuse to come out and see us.

How about special events? Do you need to learn how to work with aluminum and to rivet things together? How about working with wood or fabric covering? Need to wire your aircraft and need to learn the basics of electrical wiring? Our hangar can host training and seminars for many events such as these. How about movie night? Bring the sodas and popcorn. We have some exciting things coming soon with our hangar and lets get ready for the future of our chapter.

Recent cost increases have taken it's toll on our chapter budget. We continue to look for donations that will help up complete the hangar and move into the next fund raising goal. There will be additional hangar projects that will improve the facilities for our chapter use. Lets keep moving forward and make this a great place for everyone.

December was a good time for the chapter. I was unable to attend the Stellar Young Eagles event. Carlos Hernandez, Jim Moss and John Gregg stepped up to run the event and helped contribute to a successful event. I would like to thank everyone else who attended as well. We also had our annual Christmas party at Dillon's BBQ. The party room was pretty full but there was still room for a few more attendees. Gifts were given out via lottery and everyone had a good time. Next year, lets have this at our new hangar. Need BBQ s and BBQers. I have my own pellet grill which is excellent for slow cooked ribs and chicken.

We have a young eagles event this January. Look for emails for additional details. If you wish to attend, please complete the training for the YPP (Youth Protection Program). We ALWAYS need pilots and ground crew for these events. Did I mention that we need pilots?

February is the Buckeye Air Fair and the Copperstate Fly-in. Each year the event keeps getting bigger and new acts are being added. Come out, fly out, and spend the day here. The air show is always exciting as well as the many shops and booths here. This event is always dependent on volunteers and if you wish to help in any way, contact Carlos Hernandez and Alex Bodak.

Look forward to seeing everyone this next year.

EAA Chapter 538 Monthly Meeting Minutes for December 14, 2021

1. The Christmas party saw ten (10) visitors and twenty-two (22) members in person.
2. Most of the visitors were friends and wives of members.
3. We began with dinner from Dillion's.
4. Following dinner we started by passing out raffle tickets and certificates for various members contribution to the chapter. Notably, Carlos Hernandez was given the VIP award for the many many hours working on the blueprints, contractors, city officials, and many functions he either chaired or participated in..
5. Darren also noted that We have a Young Eagles events planned events are in January, February and June of 2022.
6. Darren made a public announcement for the Buckeye/Copperstate Fly-In next February 17 – 20 of 2022. Go to <https://www.copperstate.org/> for all the information. They are always looking for volunteers.
7. .The winners of the raffle are as follows. Cheri McGunagle won the \$25 gift certificate to Chipolte, Jim Moss was named Eagle Flight Leader, Trudie Lunacek won a 538 mug, John Gregg won the Aircraft Spruce \$50 gift certificate, Katherine Wilcoxson won an EAA 2022 calendar, Alex Bodak won a \$25 gift certificate to The Texas Roadhouse restaurant, Diane Wheeler won the \$25 gift certificate to The Red Lobster restaurant, Carlos Hernandez won an EAA 2022 calendar, Larry Jansick won a \$20 membership renewal, David Timberlake won a 538 mug, Lynn Snow won Theater Tickets for two, Stuart Snow won the other \$50 gift certificate to Aircraft Spruce, Roger Whittier won a \$20 membership renewal, and Katie Velvick won a \$25 gift certificate to the Red Robin restaurant.
8. We are without a Tech rep or flight advisor. If anybody is interested contact Darren H.
9. Carlos H gave a hangar progress report., noting that we have one contractor who needed to get us their ROC; Insurance, and bond numbers and our permit will be issued.
10. The meeting adjourned about 8:54 P.M.

PLEASE TAKE THE END OF YEAR**CHAPTER SURVEY FROM EAA.****Chapter Survey**

This year's chapter survey is now open! Please complete the chapter survey here and be sure to forward it on to your members and encourage them to complete it as well. In addition, a stand-alone email will be forwarded to all chapter leaders which can be shared with your members. Consider including the survey link in your next newsletter. The survey not only provides valuable information to help you to improve your chapter, but it can also assist the chapter in gaining credit toward the Chapter Recognition program when at least 20 percent of your chapter members engage in this short survey.

**Click on the web address listed below. There are 10 questions.
Thanks for your help.**

<https://www.surveymonkey.com/r/MS9JT8Q>

– NOTICE NOTICE –

Chris Rute will loan his airplane scales for a donation to the chapter.

Members Information

John Gregg has us registered for amazon smile.

<https://smile.amazon.com/>

When you log into the Amazon Smile site, you must select the charity you are supporting, 538. You will see this area in the black upper band middle of the screen. Note: Currently, Guide Star, the company that Amazon uses to verify qualified charities only utilizes the first line of our name: "EAA 538" is used. Once on the Amazon Smile site, you will order as usual. **Thanks John Gregg Jr.**

FOR SALE PAGE 1

I would like to put this out to the EAA chapter membership that I have project space available in my hangar at Deer Valley. I currently lease a small T hanger but I only have my Laser in it currently. I am prohibited from "subletting" the space, but I would be happy to host an EAA member and their project in my hangar for a small monthly offset. I have plenty of open space.

Eric Moore

ericmoore68@gmail.com

I was flying an RV10 out of DVT. I recently sold it for him. I'm not sure he wants to let go of the hangar yet and I'm not sure his plan on getting another plane. So if someone needs a hangar I would be okay going three months at a time but I'm sure it could be 6 months or more.

F O R S A L E P A G E 2

My friend Cora Lee in Del Norte , Colorado lives on the airport at KRCV East slope of the rockies East of Wolf Creek pass. Astronaut Kent Rominger airport.

She is is selling her airport hangar, paved taxiway.. Metal, concrete floor, power. 42' by 30' with a motor operator pull up hinged folding door. Right now I think her price is around \$65,000. Her number is 719 - 657 - 0846. If anyone has any other questions or can't get hold of her they can call me .

Rodney at 623-640-4704

Leave a message due to robocalls.

I am a former member of Chapter 538 and still receive your newsletters.

I am no longer an active pilot or builder and have several items I hope someone can put to good use. Here is a list:

Tail Dragger used to move easily RV aircraft

Garmin 396 portable GPS (works well but data base is out of date & battery not charged)

2 Lightspeed 15/20XL noise canceling head sets (one needs new gel ear cups)

1 David Clark H20-10 headset (not noise canceling)

1 FlightCom 5DX headset (not noise canceling)

Aerox 13 cu ft oxygen cylinder with carry case and masks

If anyone has interest in these items please let me know.

1/6 Share in Cherokee Partnership

Our RV-7 is just about done, so it's time for me to sell my 1/6 share in a 6-person PA28-140/160 partnership at Falcon Field that I have really enjoyed. Updated avionics include GNC355 touchscreen WAAS GPS/Com with KLX135A 2nd com, GMA345 Bluetooth audio panel and GTX335 ADS-B Out transponder. 160 hp engine STC and PowerFlow exhaust provide great climb rate & high density altitude performance. Monthly dues of \$135 covers T-shade, insurance and maintenance - combined with \$30/hr dry makes for low cost flying. \$700 Alex Hardt (480) 220-5841 call or text

Own or Lease a Chapter Facility

By Serena Kamps, Chapter Field Rep I, EAA Lifetime 10110280

December 2021 –

Whether you rent a space or have built or bought a hangar, if your chapter has a space to call its own, you know how beneficial it is. It simplifies meetings, gatherings, and events, provides space for storage and build projects, and creates a sense of chapter pride and belonging as members have a place to hang out at the airport. A chapter facility gives you the freedom and ability to do things when and how you want.

As you can see from the pictures, chapter facilities are as diverse as chapters themselves. As defined by our chapter insurance program however, a chapter facility is a space that the chapter owns, leases, or has 24/7 access to for at least 30 consecutive days. If you have such a facility, you should be purchasing insurance that includes facility insurance during renewal. When you do this, your chapter receives this recognition point.

Although obtaining your own chapter facility may seem like a lofty goal, it is definitely something each chapter should be working toward. You'll need to have the support of the entire chapter to be successful. Having clearly established goals for what you will do with your facility once obtained is a key part of gaining this buy-in. Establishing the "why" also helps you to make a solid case when fundraising. When you have a clear understanding of your fundraising goals and a proven record of good things your chapter does for the community and communicate these well, it might surprise you the number of people willing to make generous contributions to your cause.

AIRPORT OF THE MONTH - CIBECUS

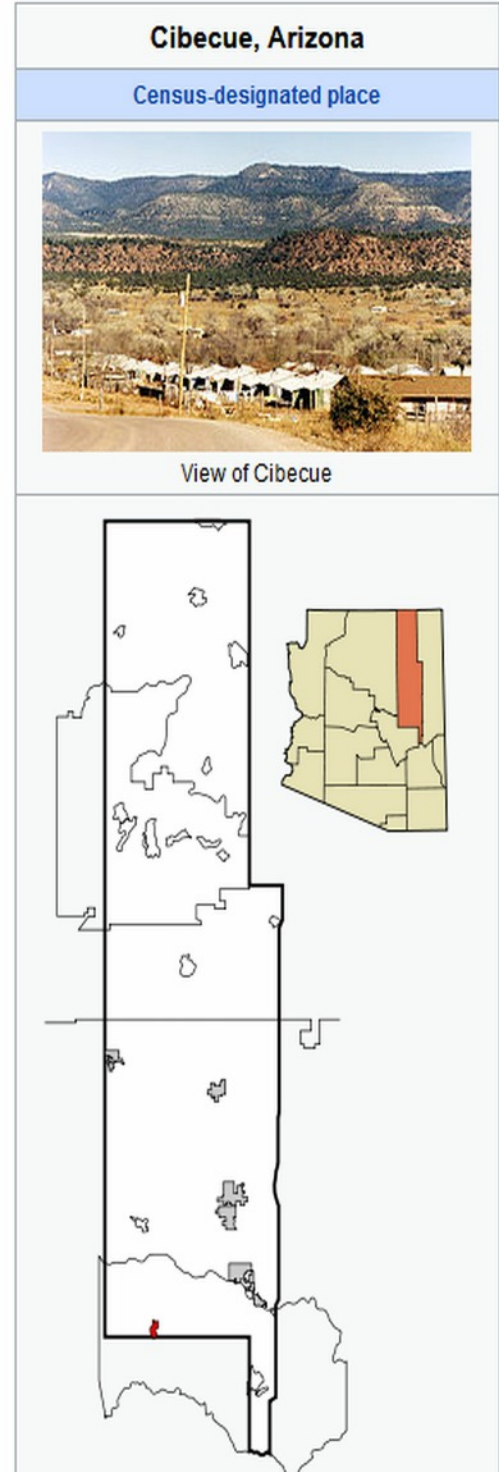

Cibecue, Arizona From Wikipedia, the free encyclopedia
 Cibecue, Arizona Census-designated place Location in the Fort Apache Indian Reservation, Navajo County, and the state of Arizona Location in the Fort Apache Indian Reservation, Navajo County, Coordinates: 34°02′23″N 110°29′08″W﻿ / ﻿Coordinates: 34°02′23″N 110°29′08″W Country United States State Arizona County Navajo Area • Total 5.97 sq mi (15.47 km²) • Land 5.97 sq mi (15.46 km²) • Water 0.00 sq mi (0.00 km²) Elevation 4,920 ft (1,500 m) Population (2020) • Total 1,816 • Density 304.14/sq mi (117.43/km²) Time zone UTC-7 (MST) ZIP code 85911 Area code(s) 928 FIPS code 04-13400 GNIS feature ID 2921

Cibecue (Western Apache: Dishchii' Bikoh "Horizontally Red Valley/Canyon") is a census-designated place (CDP) in Navajo County, Arizona, United States, on the Fort Apache Indian Reservation. The population was 1,713 in the 2010 United States Census. The current council leaders are Arnold Beach Sr. and Tony Alsenay.

The Cibecue community has a high unemployment rate, which was exacerbated by the Rodeo–Chediski Fire, Arizona's second-largest wildfire in recorded history. Education is the sector that employs the most people in the community.

Transportation. Cibecue Airport is a public use general aviation airport located four nautical miles (7 km) southeast of the central business district of Cibecue. The White Mountain Apache Tribe operates the Fort Apache Connection Transit, which provides local bus service.

Education. The area is served by the Whiteriver Unified School District and the Dishchii' Bikoh Community School. Dishchii'bikoh Community School,[a] also called the Cibecue Community School, is a small K-12, grant-funded day school in Cibecue, Arizona. It is run by the Fort Apache Agency, a division of the Bureau of Indian Affairs. The school's superintendent is Juan Aragon. The school is subdivided into an elementary, middle, and high school, each with a separate principal.

AIRPORT OF THE MONTH - CIBECUS CONTINUED

Cibecue Airport (FAA LID: Z95) is a public use airport located 4.6 miles (4.0 nmi; 7.4 km) southeast of the central business district of Cibecue, in Navajo County, Arizona, United States.[1] It is owned by the White Mountain Apache Tribe.[1] This airport is included in the National Plan of Integrated Airport Systems, which categorized it as a general aviation facility. Cibecue Airport covers an area of 163 acres (66 ha) at an elevation of 5,037 feet (1,535 m) above mean sea level. It has one runway designated 7/25 with a gravel and dirt surface measuring 4,200 by 100 feet (1,280 x 30 m).

- MEMBER BUILDS SHARING -***IVAN MANOOGIAN MAKES PROGRESS ON HIS SAILPLANE.******PAUL FISHER RV-12 BUILD***

A lot of progress on the fuselage, though there still are supply issues. The fuselage is built out from the center section. The first picture is with the tank/baggage area added aft of the center, The second shows the seat ribs sticking up behind the center section (seats are forward of the center, picture taken from the aft looking forward).

The next picture shows the attachment mechanism for the removable wings. The wing spar slides in above the black roller and below the white block. Each spar has a pair of bushings like the copper colored ones in the center bulkhead that line up with those bushings and receive a BIG PIN that ties the wings to the center section. The BIG PIN has a locking pin with micro-switches that illuminate a BIG RED light on the panel if they are not in position, as well as lock out the starter. The loads are all concentrated here - the landing gear attaches to the bottom of the grey center bulkhead, and the seats are immediately in front, fuel tank and baggage behind. This also minimizes CG shifts by putting the variable weight close to the wing.

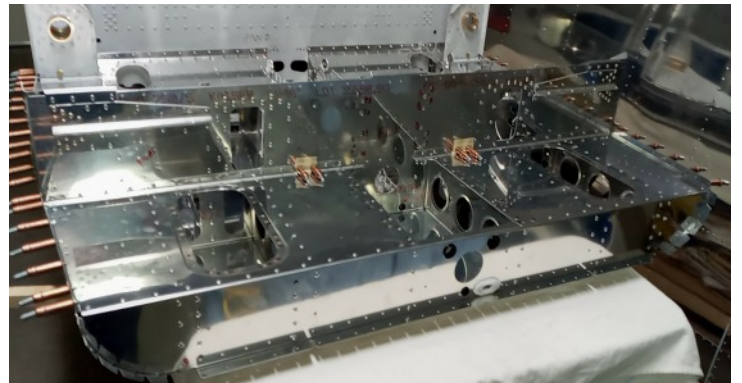

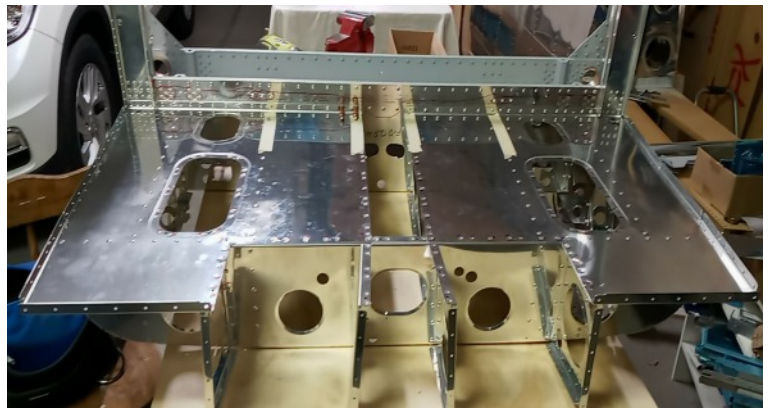

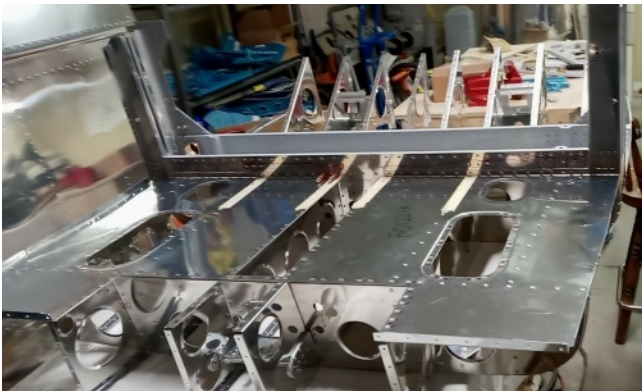

- MEMBER BUILDS SHARING -**PAUL FISHER RV-12 BUILD CONTINUED**

The next picture is the fuselage upside down, getting skins installed. Note the small pieces of skin on the corner to cover what is a compound curve.

The final picture is right side up, showing the area in front of the seats where you step into the aircraft. The next section is the foot well & firewall. No ribs in that section but a center tunnel up to the firewall provides strength. The engine mounts bolt through the firewall to brackets on the tunnel.

Supplies needed - I damaged a tunnel stiffener when I hit the flange when squeezing a nut plate rivet - new part on order. Vans sent a notice that they made an error bending the longerons for some kits - of course I have the incorrect parts - they will ship shortly. I need fuel tank sealant to seal the 3 piece firewall together, 3.5 OZ tube on order. I also need a small amount of tank sealant to seal the position light farings to the wing tip. Might as well do that with the firewall, but first I need to fill the gaps around the faring with flox - procuring the epoxy locally. And Vans still owes me some parts that were back-ordered when I got the kit - not needed yet - but I will soon.

Paul

- MEMBER BUILDS SHARING -**Scott Davis**

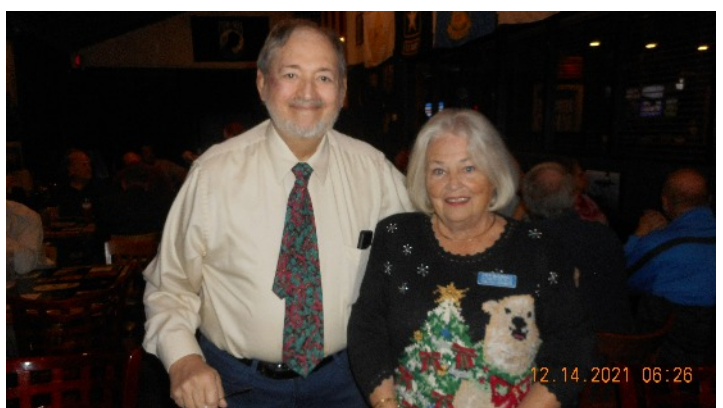

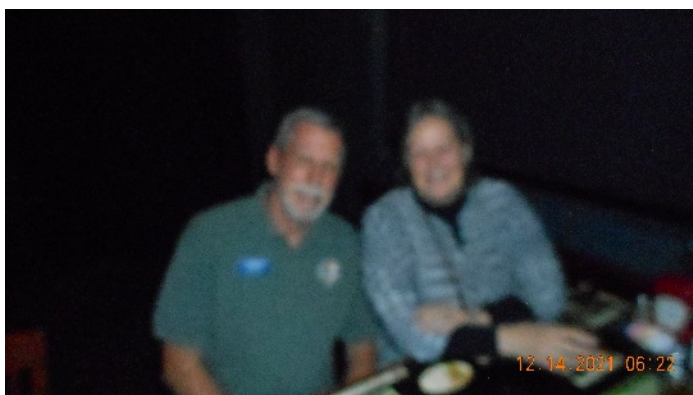

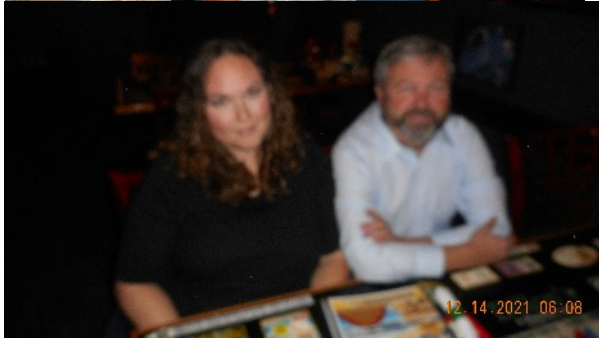

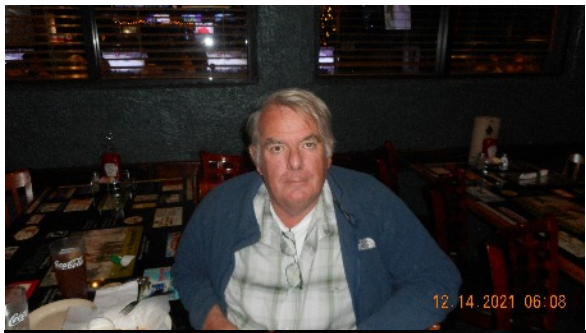

Attached are current photos of my RV-14 project you're welcome to use. It's a Quickbuild kit. I started construction 2 years ago and I'm at the 70% done, 50% to go stage. I sometimes feel like I'll be at that stage forever! Right now working on the wings will awaiting delivery of my Finishing Kit. It's a taildragger and will have an IO-390-EXP119 engine, Hartzell prop and Garmin G3X IFR panel.

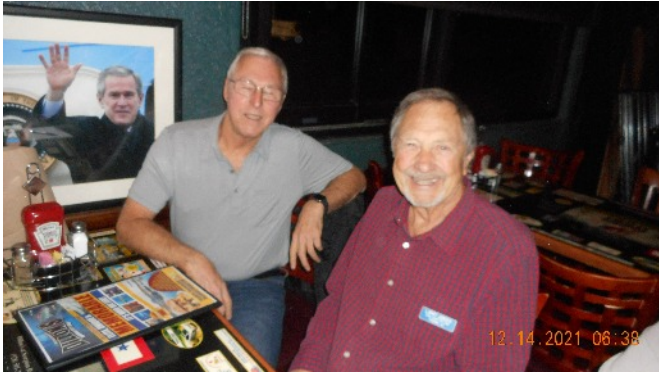

CONGRATULATIONS TO KATHERINE WILCOXSON ON GRADUATING FROM EMBRY RIDDE. AND GETTING YOUR SCHOLARSHIP TO UNITED FLIGHT SCHOOL
