

AUGUST MEETING

The monthly meeting will be held on Monday August 14, 7:30 P.M. at Northern Airmotive, Holman Field, St. Paul. Anyone having slides, movies, or pictures of the recent convention at Oshkosh should bring them to this meeting.

John Stagers will have his P 85 V8 powered Pietyenpol there for us to see. Come on time, as he will have to leave before dark to enable him to return to Fleming Field.

NEWS FROM HEADQUARTERS

The FAA is issuing a notice of proposed rule changes which would reduce to 40 the period of restrictions on experimental aircraft on which certificated engines are used. The period of 75 for non certificated engine aircraft would remain the same. They are also planning to remove amateur built aircraft from the experimental category and create a separate category.
