- FLORIN SULLIVAN - Designee 739-8658

WELCOME NEW MEMBERS

The September Meeting was held at Northern Aeromotive, items of concern to all members were discussed and nominations made for chapter officers.

The October Meeting will be held at Northern Aeromotive, St. Paul Downtown Airport at 7 PM, Monday October 8th. Election of New Chapter Officers will be held. This meeting will shape the activity of our chapter for the next year. In addition to selecting the chapter officers, this is the time to bring up your suggestions for chapter activities, speakers and programs for the coming year.

Aviation Safety is one area that we of the EAA are in an excellent position to promote. The seriousness of this subject is brought to mind by the fatal accident by one of the National Aerobatic pilots, considerable damage to another's aircraft, and the involvement of Paul's P-64 in a serious accident that did considerable damage to it. There are many variables in flying; some within our control, some within another's control, and others completely beyond anyone's direct control. Each of us are obligated to do our best as a builder, and pilot. By encouraging others to join us, ~~we can make them~~ equally conscious of safety. If we in our activities, and by our example encourage others to exercise good judgement concerning the uncontrollable factors in flying, Aviation can be a 100% enjoyable and safe activity.

BUY - SELL - TRADE Jack Hickey is badly in need of a large compass and a 140 MPH airspeed and is offering to pay UP TO \$1,000.00 for either/or with a percentage to anyone with information leading to the location of same.
