

SPEED'S NEWS

SAINT PAUL

54

Meetings: This coming Monday night,
Sept. 13 at 7:30....
Northernaire Hangar
St. Paul airport

President: Chuck Larsen
Vice-President: Gerald Laundry
Sec./Treasurer: Rosemary Frank
Designer: Roger Westerberg

The chapter picnic was held on schedule and about 40 or 50 souls showed up. Ray Wyland offered the use of his hangar as it was cooler than the Hobo hangar. Ray and Dave Flebiger gave rides for those who wanted them. Gene Frank brought his Bensen gyrocopter over for a demo ride but fuel problems prevented Gene from any airwork. Al Amnden showed up with his nidget Mustang and did a few fly-bys. Our Chapter office finally made it to the last meeting and it's really a dandy!! Lyle Hopkins evidently didn't want a bunch of finicky homebuilders picking at his workmanship.

780 No. Fairview
New Brighton, Minn. 55112

Correct the following address for Ron Voelkner. His new address is:
2460 Meadow

North St. Paul

Anybody catch Don Stock doing volunteer work at Oshkosh this year?? Or any year??

Eldon Boose is flying a Taylorcraft he bought recently. Highwater John (Joyce) is flying a SeeBee he also bought recently. Jim Olson and Gerald Laundry bought Ed Keenan's Flut-R-Bug. Cal Jansen is getting parts of his T-18 together for winter assembly in his basement. Jim Tome will probably be the 2nd man in the local area to get his Vari-Eze foam kit. The first man was one of Jim's friends of the Anoka chapter and the two of them have been hot-wiring foam for the past couple weeks. Any who are interested should give Jim a call. Elvira's flying!! With the new annual and top O. H., she should be good for a few years without the down time that has been experienced in the past.

At the next meeting, there'll be a speaker--a man who builds engines from scratch for a living and for his hobby. Hopefully he will have a small fan-jet engine he designed at the meeting. The upcoming mid-month meeting will be at Ron Voelkner's house to see his Zenith. (note the address change above). The Zenith is the one that was assembled and flown during

the Oshkosh convention. They began assembly on the first Saturday and the flight was the following Saturday. Ron's meeting will be on the second Monday night after our regular meeting at 7:30. The date is the 27th. A reminder notice will probably be sent out along with a map. October's mid-month meeting will be held at Chuck Larsen's house to see his Pietenpol. That will be the last scheduled mid-month meeting for the cold season.

Speaking of Chuck...he won't be at the meeting; you'll have to listen to Laundry again.

Hangar talk is going around again

Suggestion Box: That the chapter purchase Jim Olson's drill press.

Tools for use:

- Drill Press - Jim Olson
- Metal cutting bandsaw - Gerald Laundry
- " " " - Ray Wyland
- " " " - John Joyce
- " " " - Lee Alexander
- 1/2" close-quarter right-angle drill - Highwater John
- Wood scarfing device - Gerald Laundry
- cable cutter & micropress tool - chapter tools (Rosemary Frank)
- Hand operated beverly shear for sheet metal- John Joyce
- Drill Press - John Joyce
- Arc or gas welder- Highwater John
- Moisture meter - Dave Fiebiger
- single & double aircraft flaring tool - "
- cold cylinder check meter - "
- tach and dwell meter - "
- riveting equipment, long and short stroke - "
- magneto synchronizer - "
- torque wrench - "
- volt and amp meters - "

Want Ads: Lyle Hopkins is looking for an 18" X 18" rigid plexiglas for the chapter trophy case. If you have a scrap piece, call him at 735-0776.

Radio, tube type, transistorized power supply, whistle-stop tuning....out of Florian's T-18. Call him at 739-8658
