

EAA 677
July Meeting
Columbus, GA

Meeting Notice

Thursday, July 14, 1983, 7:30, First Federal Building,
Bealwood Connector.

Program

This month's program will feature slides and reports from OSHKOSH. Be sure to attend to catch up on all the latest news and developments.

Chapter News

Harold Buck and Leroy Story have started a joint project in the construction of Columbus's own home built - the Mini Coupe. The center section and one wing are almost complete after only a very short time since beginning. Harold also reports that he is essentially through with his previous project except for the engine. Hopefully it will be ready for final assembly and flight before too long.

Airport News

Better news this month than last...No aircraft lost due to accidents. Have you heard that the Columbus Airport plans an activity during late August? I do not have the details yet, but first reports indicate the possibility of a open-house format, displays (probably including this chapter), and quite likely aerobatic demonstrations. All of this at good old Columbus Muni. Watch the next newsletter for more detailed information.

Coming Events

None to report. All members are encouraged to pass on any news to me so that it can be included in our newsletter. Reach me at 323-7304 (work) or 561-2618 (home). Let's all contribute to make this a meaningful publication.

See you Thursday!
