You're invited to our free showing of the ALCOR Engine Care Clinic. This 35 minute videotape presentation presents the real facts about EGT, mixture control, and the health of your engine. You'll see how and why mixture affects engine performance as well as how to use the EGT to maximize fuel economy and

extend the life of your engine. The Clinic also shows how you can use the EGT to detect and diagnose various engine problems in their early stages, before they lead to costly repairs! This is one pilot education program that should not be missed. We'll be looking forward to seeing you there.
