Many thanks to
Mark Hutton, Gerald
and Randy Resh for
sharing your photos!

A Message from Chapter 732 President

Well it's officially summer. Hanger work is limited to mornings. My hanger faces west. We had a good turn out at Huntsville of 32 members and guests. If memory serves 11 planes flew in. Thanks to Charlie and family for hosting. Weather got us for Young Eagles on the 10th. We will discuss a reload at the meeting. We were approached by Laci from the museum to see if we could see about bringing the Tri-Motor back. With almost unanimous consent from those in attendance I have contacted national to host next year. They are not doing anything for scheduling for next year until after AirVenture. Several other things are in the works. Hope to see you all at the meeting.

Thanks Rich

EAA Chapter 732 - Treasurer's Report, June, 2023

Period: 05/15/2023 – 06/12/2023

Previous Balance: \$2,435.72

Deposits: \$ 40.00 Dues and Donations

Withdrawals: \$ 175.60 iPad for Young Eagles

Current Balance: \$2,300.12

Members who have paid their 2023 chapter dues: 40

Hello everyone. Just a gentle reminder that it is not too late to pay your 2023 chapter member dues. Dues are still only \$20. You can pay your dues at the June chapter meeting or you can send me a check.

If paying by check, make the check payable to: EAA Chapter 732.

Send check to the address below.

I look forward to seeing you at the upcoming meetings.

Randy Doughty

Several members requested Deanne's Recipe
Pumpkin Dump Cake

preheat oven to 350

Mix the following either in a 9X13 dish or bowl.

- 1 can (29 Oz) pumpkin - not pie filling
- 1 can (13 oz) evaporated milk
- 3 beaten eggs
- 1 1/4 cup sugar (may sub, Splenda)
- 2 tsp cinnamon
- 1 tsp nutmeg
- 1/8 tsp ginger
- 1/2 tsp salt
- 1/2 tsp clove
- 1/4 tsp allspice

*please note that spices can be adjusted to personal tastes.

Once the above is mixed well and placed in baking dish do the following:

Sprinkle on box of cake mix evenly over the top of pumpkin mixture. You may use yellow, white, or spice cake mix, I usually use yellow. Pat down the dry mix then sprinkle 1 cup of chopped nuts over the dish. Again, I use pecans as a rule but walnuts work also. Nuts and nutmeg can be omitted if nut allergies are a concern. Finally, melt and drizzle 1 cup of butter over the dish.

Place baking dish in 350 degree oven for 50-60 minutes. Let cool and serve. Store in refrigerator.

Thank you for
sharing, Deanne!

Project Update

Submitted By Gerald Resh

Yes, I am working on the Pietenpol. If all goes well, it should be close to being ready to fire up the engine for the first time by the end of July.

Thanks,
Gerald

Turkey Creek Fly-In

Submitted By Mark Hutton

I was flying with my cousin's son. Trying to plant a Flying seed to see what might grow!

Early morning flying can be quite rewarding with beautiful sunrises. This was taken last month on a flight from KGYI to KASG. The photo was near Durant Oklahoma.

Flying Safely Safety Advisor

By Jennifer Caron, FAA Safety Briefing Magazine

If I see upcoming road hazards, such as an accident or a disabled vehicle, I flash the headlights to my fellow drivers in the opposite lane. Where I live, it is a goodwill gesture to let fellow drivers know to be vigilant. That same mentality drives us to step forward, speak out, and let other people know when something's not right.

.... Report your concerns to the aviation community and file a "NASA Report" online. Your NASA Report is free, confidential, online, and there's no punishment for reporting.

What is a NASA Report, and How Does It Work?

The "NASA Report" is the popular nickname for the officially-named NASA Aviation Safety Reporting System (ASRS). ASRS is a voluntary safety-reporting program funded by the FAA and administered by the National Aeronautics and Space Administration (NASA). The "NASA Report" moniker arises from the fact that NASA, not the FAA, collects and analyzes aviation safety incident reports and keeps them confidential.

NASA's ASRS welcomes all users to report any safety issue, especially information that could help prevent an accident. They protect your identity and the identity of all other parties involved. In fact, the FAA may not seek, and ASRS may not release to the FAA any information that might reveal the identity of any party.

ASRS collects de-identified information and the reporter's narratives to spot deficiencies and discrepancies in the National Airspace System (NAS). These narratives provide a rich source of information for understanding the nature of hazards and enhance the basis for human factors research and recommendations for future operations.

At ASRS, human eyeballs review every single report. A minimum of two expert aviation analysts review these reports to classify the aviation hazard, de-identify it, and flag critical safety information for immediate action.

For example, when ASRS receives a high-priority/safety critical report, an alerting message goes to the appropriate FAA office or aviation authority about the safety concern. But while the FAA gets the details of the incident, they know nothing about you.

ASRS completely removes names, N-numbers, dates, times, and anything that could identify those involved. They keep your de-identified report in the database to improve safety for everyone in the NAS and so that others can learn from you.

See Something? Say Something.

Maintenance technicians, pilots, ground personnel — anyone who uses the NAS — can file a "NASA Report." You can submit a report about any incident or situation that you believe compromises aviation safety — something that you saw, experienced, or were involved in — any safety issue that needs to be addressed.....

We can do better! Speak up, do your part, and file a report at asrs.arc.nasa.gov. **By sharing things you see or do, you may just save someone else's life.**

Aviation Safety Reporting Program**

May 2023 Chapter Camping Trip

Submitted By Gerald Resh

Three 732 members flew over to Trigger Gap and camped before flying over to Huntsville for the meeting. There were 6 airplanes total that spent the night, with another 3 flying in on Sunday morning.
