New Business

Wings and Wheels 30th Anniversary edition is moving forward. We met with the Airport advisory committee and discussed their concerns about ramp activity as there is also an Indy car race the same weekend. We will handle the ramp the way it is during the T28 clinic with a roped off area for visitors.

We are on the agenda for approval at the April county transportation committee meeting.

We are looking for people to fill out the volunteer signup sheet. This has always been an all-hands-on deck event for the chapter.

Agenda for Next Meeting - TBD –

Adjournment

Meeting concluded at 8:05 p.m.

Minutes submitted by: Mike Jones.

Please see the following signup page to volunteer for the Wings & Wheels 2023 event.

March 10: Test pilot Pete “Maverick” Mitchell, after 30 years of service, is back to train a group of Top Gun graduates for a special mission.

DC-3 Project

Glenn Valenstein indicated the DC-3 project will be a “preservation effort only” and there are no intentions to maintain it in airworthy condition due to expense. Mike Jones notes that the AHC has had a record number of visitors during 2022 including pre-COVID counts.

Redbird FMX

**Full motion flight simulator
three-axis yaw, pitch, and roll.**

The FMX is easy to operate, and you can program it to operate in different types of weather conditions, from light winds and VFR, to IFR with low overcast, low visibility. And you can fly virtually to many different airports.

Contact Aviation Heritage Center of Wisconsin Simulator Manager Jay Hoogstra, CFII at 920.698.0850 or jdj@excel.net to discuss your simulator needs. Contact Tony Kolar, CFII at 920.698.6142 or tonykolar@gmail.com for additional information.

New Rule to Improve Safety at Airports

A new rule from the FAA will help airports detect and mitigate safety problems before they result in accidents or incidents. The final rule requires certain airports to develop and implement a safety management

system (SMS) [faa.gov/airports/airport_safety/safety_management_systems/external](https://www.faa.gov/airports/airport_safety/safety_management_systems/external).

SMS programs have helped foster the safest era in commercial aviation history. Fundamental to the program is identifying risks and then taking steps to correct potential safety issues before they result in accidents or incidents.

The final rule applies to over 200 of America's busiest commercial airports. Depending on the airport's classification and operations, the timeline to fully implement SMS ranges from four to five and a half years. The rule takes effect 60 days after publication in the Federal

Register [faa.gov/airports/airport_safety/safety_management_systems/external/airport_sms_final_rule_draft](https://www.faa.gov/airports/airport_safety/safety_management_systems/external/airport_sms_final_rule_draft).

Fly Safe — Transition Training

Just like switching between automatic and manual in a car, transitioning from one aircraft to a different one comes with unique challenges — even when you're certificated to operate that specific category or class.
