Wings & Wheels 2024 Planning Begins

The EAA Chapter 766 Wings & Wheels committee began planning the Father's Day 2024 event on February 23, 2024. Chapter members and volunteers help make the event special for all attendees.

A signup sheet for volunteering will be passed around at the upcoming meetings and will also be included in the newsletter. If you know of someone interested in volunteering for Wings & Wheels 2024, please have them contact Brian Lerwick for additional information.

Returning Member

Jack Erdmann has returned to EAA Chapter 766 after spending time in Idaho. Some members may recall Jack was the newsletter editor for the chapter. He moved to Idaho because he is a Ministry Advocate for Mission Aviation Fellowship (MAF). Their headquarters is in Nampa, ID.

Jack has a Private Pilot license but the FAA pulled the needed Medical Certificate due to sleep apnea. He has 144 hours of flying time in several different aircraft including (mostly) Cessna 172's and was most impressed with the Cirrus SR22. He has a tailwheel endorsement and was nearing a complex endorsement. It was when he had almost completed the complex training that the FAA pulled his Medical Certificate.

Jack moved back to Wisconsin in July 2023 and still has an interest in Aviation. He is looking forward to meeting both old and new friends in the Chapter!

Protecting Your Pilot Certificate

The FAA and Aircraft Owners and Pilots Association (AOPA) discuss protecting your pilot certificate in the new **WINGS**-credit course ALC-1093, *Cost Sharing, Time Building, and Posting on Social Media*.

The first chapter of the course covers important information that pilots and aircraft owners need to know and understand regarding flying passengers and property safely and legally.

The second chapter is about time building, which is not as intuitive as cost sharing and pertains to flying to build time and experience. It explores topics like whether you can fly your airplane and be reimbursed by your company.

The third chapter covers important information that pilots and aircraft owners need to know and understand when it comes to posting on social media, holding out for compensation or hire, and what may be used as evidence should safety regulations be compromised.

Take the course at bit.ly/alc-1093 and get **WINGS** pilot proficiency credit! *Make sure to leave us feedback after taking the exam.*
