Monday through Sunday: 10:00 a.m. – 5:00 p.m.  
Closed New Year's Day, Easter Sunday, Thanksgiving, Christmas Eve, Christmas Day. Extended opening hours are in effect during AirVenture and at other times by special arrangement. Please call the EAA Aviation Museum at 920-426-4818.

## Homebuilders Week – Online Event Starts January 23

An online opportunity to learn about all aspects of building your own aircraft  
By Charlie Becker, EAA Homebuilt Community Manager

EAA will be hosting our third annual Homebuilders Week online learning event for aircraft builders: ([www.EAA.org/HomebuildersWeek](http://www.EAA.org/HomebuildersWeek)). It will be five straight days of educational forums covering a broad spectrum of aircraft building topics. It will start on Monday, January 23, 2023, and run until Friday, January 27, 2023. The live online presentations will be open to everyone interested in building their own aircraft. Sessions will start at 11:30 a.m. CST and run until 8:30 p.m. CST daily.

This event is an opportunity for a new person to jump in with both feet and learn a lot about the wonderful world of homebuilding. We will cover areas like getting started successfully and techniques when building with sheet metal, composites, steel, and wood. But it won't be just for the newbie; we are offering in-depth talks on panel planning, engine selection, FAA certification, flight testing, and selling a homebuilt aircraft. There will be something for every builder, whether you are just starting out, knee deep in a project, or just received your airworthiness certificate — it is going to be a great learning opportunity.

EAA is working with industry experts, kit manufacturers, and other subject matter experts to provide top-notch material for builders. The sessions will be live and allow time for attendee questions. Recordings will be archived and available to EAA members for review. EAA Homebuilders Week coincides with the 70th anniversary of the founding of the Experimental Aircraft Association in 1953. Those founding members of EAA lit the fuse on the homebuilt movement that provides affordable access to aircraft ownership and today has spread worldwide.

EAA Homebuilders Week is possible through the generous sponsorships of Aircraft Spruce & Specialty Co., Dynon, Scheme Designers, Inc., and Van's Aircraft, Inc.

Visit [EAA.org/HomebuildersWeek](http://EAA.org/HomebuildersWeek) to review the schedule and sign up for a session.

## Homebuilders Week Schedule

January 23 - 27, 2023

All Time Central

[www.EAA.org/HomebuildersWeek](http://www.EAA.org/HomebuildersWeek)

CST	Monday 1/23/2023	Tuesday 1/24/2023	Wednesday 1/25/2023	Thursday 1/26/2023	Friday 1/27/2023

## **"(Re)Introduction to the Garmin GNS 430/530 Part 9 Finale"**

Topic: GNS Series Finale

On Thursday, January 5, 2023 at 19:00 CST;

### **Select Number:**

WP05118204

### **Description:**

This will be the final episode of our series on the Garmin GNS430/530 navigators. We'll look through the mail bag, chat, and Q&A from previous programs and investigate answers to frequently asked questions, and talk a little about things we've learned and some suggestions on how best to go about learning and flying with these powerful navigators.

Though they are now somewhat dated, the Garmin GNS530 and 430 remain ubiquitous in the GA fleet. These powerful navigation devices remain somewhat mysterious to many aviators, so Cap'n Mike will demystify the basics of this very capable equipment. Whether you've had one for years, found a used one on eBay last week, or recently bought an airplane that came with one of these installed, you're sure to understand this gear better after this webinar.

Join host Captain Brian Schiff and presenter Captain Mike Jesch for this re-introduction to the wonders of modern GPS navigators. Using the Garmin simulator as well as photos and videos from his own airplane, we will illustrate, demonstrate, and educate on the basics.

To view further details and registration information for this webinar, [click here](#).

The sponsor for this seminar is: **FAASTeam**

The following credit(s) are available for the WINGS/AMT Programs:

Basic Knowledge 3 - 1 Credit

Advanced Knowledge 1 - 1 Credit
