EAA Chapter 766 Holiday Party

Members should have received a letter asking for membership information and annual dues for 2025. Included in the letter is an invitation to the holiday party that will be held in January. Members should fill in their information, including your intentions of attending the January Holiday Party, and mail with your annual dues in the included pre-addressed envelope to the Chapter 766 Treasurer. Note: Chapter Annual renewal is due by end of November to EAA headquarters. Page included.

EAA Chapter 766 Membership Meeting

In-person meetings are held the 3rd Monday of each month. “Hanger Talk” with food begins at 6:00 PM followed by a membership meeting at 7:00 PM. One member volunteers to bring the main dish while other members are asked to bring a dish to pass. An interesting program will follow the meeting.

Interested in Joining EAA Chapter 766?

If you or someone you know is interested in joining, please contact our Membership Director, Luiz Cordeiro at lcordeiro@att.net or 920-912-4617. Please click [HERE](#) for the application form on the membership page of the Chapter 766 website to join EAA Chapter 766.

EAA Chapter 766 Officers & Directors

President – Brian Lerwick

Secretary – Kyle Hokel

Both Kyle Hokel and Jim Fintelmann were voted in for 2025-6 by majority

Activities – Open Position

Young Eagles – Brian L. / Lee Kunze

Newsletter/Web - Bruce Becker

Vice-President – Dan Miller

Treasurer – Jim Fintelmann

Membership – Luiz Cordeiro

AHC Representative – Tony Kolar

Programs – Chris Roenitz (Interim)

EAA Chapter 766 IMC Club

The **IMC Club meetings** are held the 1st Monday of each month in the Aviation Heritage Center Library at 6:30 pm. Tony Kolar, CFII and Dave Rudd, IMC Club Coordinator, will facilitate the meetings.

EAA Chapter 766

Meeting Minutes - Membership Meeting
Monday 11/18/2024

Opening

The November membership meeting of EAA Chapter 766 was called to order at 7:00 p.m. Monday 11/18/24.

Present – 18 members present.

EAA Museum Hours

Monday through Sunday: 10:00 a.m. – 5:00 p.m. Please call the EAA Aviation Museum at 920-426-4818 with any questions.

Wright Brothers Memorial Banquet December 13, 2024 | 6:30 – 9:30 p.m.

Join us for the EAA Wright Brothers Memorial Banquet, where you'll experience a once-in-a-lifetime evening.

The EAA Wright Brothers Memorial Banquet honors the spirit and achievements of Wilbur and Orville Wright. This annual banquet provides a memorable experience that will have you returning year after year.

Listen to an inspiring presentation given by a special keynote speaker who shares with us their story of adventure, camaraderie, and flight. Enjoy cocktails and a full-service dinner inside the EAA Aviation Museum's Eagle Hangar, a hall dedicated to the memory of those who served valiantly.

Click [here](#) to purchase tickets.

Keynote Speaker - Paul Dye

As the longest-serving NASA flight director in history, Paul Dye was in a leadership position for 38 space shuttle missions, nine of which he served as the lead flight director, responsible for development and training for the mission, as well as real-time execution of all facets of the shuttle flight. Coordinating the work of thousands of mission planners, flight controllers, trainers, and astronauts, Dye spent 20 years in the center seat of Mission Control. These years were preceded by 12 years spent as a systems flight controller, and more years spent as an International Space Station flight director before his retirement in 2013.

We are excited to announce that Paul will be holding a book signing for his book, *Shuttle, Houston: My Life in the Center Seat of Mission Control*, in the lobby of the EAA Aviation Museum following the conclusion of the Wright Brothers Memorial Banquet. His book will be available for purchase at the Barnstormer Boutique prior to the book signing.

Click [here](#) to purchase the book.

Eliminate Aviation Gasoline Lead Emissions (EAGLE)

Fall 2024 Update

The aviation community has long recognized the need to eliminate lead emissions from piston-engine aircraft, a goal set to be achieved by the end of 2030 through the leadership of the *Eliminate Aviation Gasoline Lead Emissions* (EAGLE) initiative. This ambitious endeavor brings together government and industry partners committed to finding a safe and reliable unleaded aviation fuel that is viable throughout the aviation supply chain. As the general aviation community works toward this goal, the role of aircraft owners cannot be overstated. They are, after all, the ultimate end-users of any new fuel, and their buy-in will be critical to its success. This transition is about more than meeting regulatory requirements—it's about ensuring that aircraft owners feel confident in the safety and reliability and availability of the new fuel. The solution must be robust enough to meet the diverse needs of the piston-engine fleet, ranging from the World War II era planes to modern helicopters.

Currently, there are three promising unleaded fuel candidates. Their developers are pursuing either the Fleet Authorization (FA) under the *Piston Aviation Fuels Initiative* (PAFI) or the traditional *Supplemental Type Certification* (STC) process via an approved model list (AML). Both pathways ensure that engines and aircraft can safely operate on the new fuel, however, regardless of the path to approval to use in the aircraft, consumer acceptance will hinge on more than FAA approval.

Fuel developers must not only prove their products' safety and compatibility with the existing fleet but also demonstrate to key industry stakeholders that their product is reliable. Aircraft owners need assurance that switching to a new fuel won't void manufacturer warranties. They also need to be confident that it won't cause damage to paint, electronics, engine components or fuel systems. The aviation supply chain will need assurances as well. This next fuel must be produced, distributed, stored, possibly comingled with other fuels, pumped, and consumed without causing damage or requiring significant equipment modifications. Industry stakeholders understand that any new fuels must meet the needs of aircraft owners and be compatible with production, distribution and dispensing systems.
