VAN'S RV-4 (PROTOTYPE) N14RV #0016891

The RV-4 prototype poses – likely somewhere in Oregon.

The RV-4's cockpit is a bit busier than the RV-3 with room for more avionics and an intercom for the rear seat passenger.

AIRCRAFT INFO

The RV-4 was the much-requested two-place follow-on to Dick VanGrunsen's popular RV-3. This RV-4, the prototype, first flew on August 21, 1979 and appeared at Oshkosh in 1980. While the RV-4's riveted aluminum structure was only designed for "sport" aerobatics, several RV-4 pilots have competed in organized aerobatic competitions, scoring well against specialty aerobatic airplanes. The RV-4 can be taken into back-country airstrips and is an excellent cross-country machine. One example has been flown around the world three times by Australian, Jon Johanson.

SPECIFICATIONS

Wing Span	23 ft.	Chord	58 in.
Length	20 ft. 4 1/2 in.	Weight (empty)	890 lbs.
Height	5 ft. 3 in.	Weight (gross)	1,500 lbs.
Wing Area	110 sq. ft.	Baggage	30 lbs.
Wing Loading	13.63 lbs/sq. ft.	Fuel Capacity	32 gal.
Power Loading	10 lbs./hp	Oil Capacity	6 qt.
Powerplant	Lycoming O-320-EIF, 150 hp		
Propeller	Cassidy Pacesetter Wood, 2-Blade, Fixed Pitch		
Range	800 Miles	Take-off Run	250 ft.
Speed (maximum)	202 mph	Landing Roll	300 ft.
Speed (cruise)	187 mph @ 8,000 ft.		
Speed (stall)	48 mph		
Rate of Climb	2,000 fpm		
Service Ceiling	24,000 ft.
