## Presidents Airspace

by Greg Thomes

Here one moment...gone the next. I experienced this in September in Central North Dakota where we have a small hunting/fishing farm. We frequently fly out for a couple of days. A crop duster pilot from Jamestown and I met while I was refueling our C117B. He took off fully loaded to spray his next field in an Air Tractor...and never came back. Larry Poleris became another project for the NTSB when he tangled with a powerline and was killed.

Every year we come-across names of pilots killed in the vocation (or avocation) that we call 'flying.' Some pilots we know well. While there are other's we know by name only.

The question I pose is this..."Are any of us really ready in case a tragedy involves ourselves"? Proper flight planning is as important as having our life's affairs in proper order. Don't think each day will go as originally planned!

May your skies be bright and breezes light.

## Vice-Presidents Airspace

by Kyle Weatherly

I will start this out with some personal updates:

Amy and I are still planning a move out of state in the next 3 years, but we may be delayed due to some family related reasons that have come up in the last Month.

The week of July 23<sup>rd</sup> was an excellent one for Amy and I this year. We made our annual pilgrimage to Oshkosh Monday – Wednesday. Returning home on Thursday and on Friday I completed a purchase of a 1968 Cessna 182L. Amy and I had been looking for a plane to fit our changing mission and the 182 was exactly what we were looking for. In the coming years we will be taking more cross country trips and this gives us a little extra room for those trips. The fact that we can do them a little faster is an added bonus as well. You will see this plane more and more in the coming years.

My Cherokee is for sale with Mike Wiskus and although we have had a few people look at it hasn't sold quite yet. Amy and I are both looking forward to going down to one plane again.

## Secretary's Airspace by Wayne Flury

### A. UPDATE FROM A PAST CHAPTER SCHOLARSHIP RECIPIENT

A couple of weeks ago I received a pleasant surprise in my email inbox...a "Thank You" plus an occupational update from one of our past scholarship recipients.

In 2018 Chapter 878 committed to a Scholarship Program and we began soliciting funds for scholarships to be awarded in 2019. The criteria was simple...be a student graduating from a Wright County high school and pursuing a career in aviation, plus fill out an application.

As detailed in the July 2019 chapter newsletter, our initial goal was to award at least one \$1000 scholarship. Donations to the program were enthusiastic, and our scholarship fund amount rose to just over \$3000. The only problem was that in our very first year we had four very qualified applicants. Due to the commitment of chapter members, additional funds were raised, and we were able to award \$1000 scholarships to all four young persons.

One of those aspiring students was Max Menzemer. The following is the text of the email Max sent to me: [Read more > 2-1/2 min read](#)

## STEM Airspace

by Dick Borrell

The leaves are falling, and the temps are getting cooler. As our plans for less outdoor activities wains and our plans for indoor activities grows how about offering a Saturday or an evening and donating some time to help us construct our classroom. We've finalized the plan for a more than 800 sq ft area and will begin moving lumber from our old hangar (C-5) to our new hangar at Maple Lake Airport on October 7<sup>th</sup>. If you send me your contact information, I'll keep you posted on each of our building opportunities.

Part of that process will be temporarily relocating many of our existing aircraft partially assembled parts and then relocating them after the work is completed. What a great chance to get some real "hands on" experience with real aircraft parts.

Our chapter will again be available at the Buffalo High School Career Day on November 13<sup>th</sup>.

Can we provide your organization with a professional speaker, a panel member or assistance with an airport facility tour? Most people do not know a fraction of what goes on behind the scenes to run an airport or an airport business that we call a Fixed Base of Operations (FBO). [Read more >](#) 2 min read

## Eagle & Young Eagle Airspace

by Kyle Weatherly

### Young Eagle events:

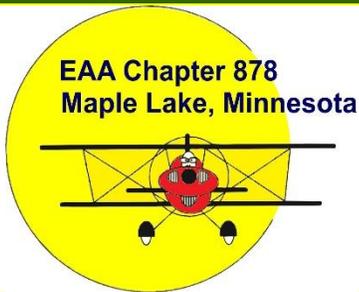

We had a successful Young Eagles Year this year. Although the weather was hot, we avoided rain outs, because there was so little rain. The only event that was cancelled this year was May. We flew in April, June, July, August, and September.

We were able to get ~ 20 kids in the air at each one of these events.

The final event this year was held in Maple Lake. We did this to spotlight the airport and our new education center. We had 8 pilots show up that day. We had 16 kids, so each pilot took two flights, with each Young Eagle getting a one-on-one ride with their pilot. Thank you to all the pilots that participated that day, and throughout the year.

### A Young Eagle Program Extends the Season:

Build and Fly program underway. [Read more >](#) 1-1/2 min read

## **EAA 878 Scholarship Airspace** by Kyle Weatherly

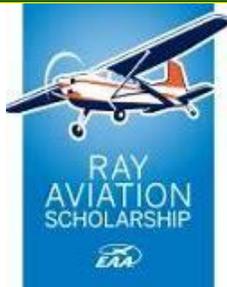

The committee members are Greg Thomas, Wayne Flury, Laura Hermann, Lloyd Melvie, Boyd Emmel, Jon Niska, and Kyle Weatherly.

**The 2024 EAA 878 scholarship will be posted by the end of the year.**

I typically find time to post the new scholarship on our website between Christmas and New Years day. Depending on my work schedule I may find time to do this earlier.

I will supply the STEM coordinator Dick Borrell the due dates for the scholarship as soon as they are determined.

Everyone, please consider stepping up to help out with this program. It is an important program and is one of the criteria for a healthy chapter. This doesn't take that much time and takes some knowledge of computers Google Forms and monitoring the website for applications. I am still around to mentor the person that takes this over hoping you will consider helping out the Youth of Wright County to enter aviation as a career. Call me and we can have a discussion: Kyle, 612 759 5227

## **Ray Scholarship Airspace** by Kyle Weatherly

No update at this time, EAA 878 will re-apply for the scholarship when they open it up, usually late January or early February.

I would really like to see someone step up to take over this important program. Where else can you make a life changing difference for a young person.

I am still around to guide and mentor the person that takes over this program. Please give it consideration it takes up some time, but I have been able to do it while managing many other EAA 878 programs as well as a work calendar that I am certain none of you would want.

Call me and we can discuss without any obligation: Kyle, 612 759 5227

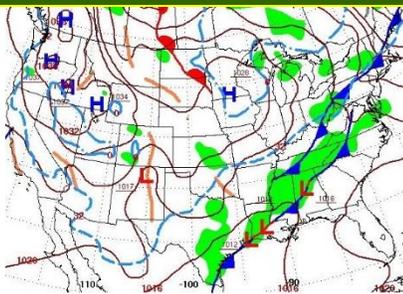

## Vim & Vigor Airspace

by Thomas Hurwitz, M.D.

### Zulu minus 5 vs 4

On 11-6-2023, we'll once again "fall back" to Central Standard Time. There is national interest in changing to permanent daylight or standard time to avoid the twice annual alternation. Minnesota is one of the states planning a permanent change to DST next spring. This will also depend on US congressional legislation. The Senate has passed a bill calling for permanent DST, but the House has yet to act. In most polls, there appears to be preference for permanent daylight, rather than standard time. This means an hour later onset of daylight which promotes wakeful functioning and an hour more of afternoon/evening light which can delay the onset of sleep propensity. Permanent DST is not supported by data and has implications for public health. But after COVID, we know how much enthusiasm there is for informed public health recommendations. #### **Wanted – Photos of You and Your Airplane**

by Elaine Morrow, Chapter Webmaster

Help me make our website a place of chapter recognition and interest. Please send me a photo of your airplane (and you) which I will include on our Chapter 878 website. This includes aircraft projects too! Send to: [pilotelaine@aol.com](mailto:pilotelaine@aol.com) or call 952-913-2356 with any questions.

#### **Requesting Chapter Member Aircraft and Project Info**

By Chris Glaeser

Chris Glaeser (as our chapter Flight Advisor) is still looking forward to getting information from all chapter members about aircraft owned, or projects working on, His focus is to have a list so that if he gets a call from someone asking if he knows anything about RV aircraft or float planes, etc., he has a source of reference.

If you haven't yet responded to Chris, please contact him with your info (a photo may also be nice) with complete data on your airplane, including engine and prop. His contact info is: 952-239-4081, or [chris.glaeser@gmail.com](mailto:chris.glaeser@gmail.com).

#### **WINGS - Pilot Proficiency Program**

The objective of the WINGS Program is to address the primary accident causal factors that continue to plague the general aviation community. By focusing on this objective, we hope to reduce the number of accidents we see each year for the same causes. As you will see, it is not a simple "Award" program but is instead a true proficiency program, designed to help improve our skills and knowledge as pilots.

## EAA Chapter 878 - Young Eagles "Build and Fly RC Airplane"

by Tom & Yvonne Rammel

On Thursday 9/14/2023 we had our first EAA Chapter 878 - Young Eagles "Build and Fly RC Airplane" build session. Everything went well and the kids seemed to enjoy the time building and learning new skills. We had three boys, Legion Maxson, Malloy Adams, and Triston Schauer. Attached is a picture of the kids working on the RC Airplane build.

The build sessions will continue each Tuesday and Thursday from 4:00 to 6:00 for the remaining weeks of September. Additional time in October will be added if needed.

<https://youtu.be/oQAIraxiaw0?feature=shared>

Here is a link to a YouTube video of the Young Eagles "Build and Fly RC Airplane" construction Part 1.

On Thursday 9/21/2023 we had our third EAA Chapter 878 - Young Eagles "Build and Fly RC Airplane" two hour build session. The kids have the majority of the fuselage done, the two wing structures mostly complete, and the Stab and Fin frame mostly done. They still have much more to do before it is complete. (80% done and 80% left to do -- the finishing touches take the longest) We had three boys, Legion Maxson, Malloy Adams, and Triston Schauer. Attached are pictures of the kids working on the RC Airplane build.

The build sessions will continue each Tuesday and Thursday from 4:00 to 6:00 for the remaining weeks of September. Additional time in October will be added if needed.

On Thursday 9/28/2023 we had our fifth EAA Chapter 878 - Young Eagles "Build and Fly RC Airplane" build session. Everything is progressing well, and the parts are starting to look like an airplane. Since the airplane is not complete, we are extending the build sessions into October. We still have three boys, Legion Maxson, Malloy Adams, and Triston Schauer. Henry gave each of the boys a quad copter. Attached is a picture of the kids and the progress on the RC Airplane build so far. If you

want to see the videos, go to YouTube, and search: Tom Rammel

Additional time in October will continue each Tuesday and Thursday from 4:00 to 6:00 October 3, 5, 10, and 12.

October 10 is the EAA Chapter 878 monthly meeting at the Buffalo Arrival/Departure building at the Buffalo airport meeting start time is 7:00 PM

We encourage the kids to become members of EAA Chapter 878 the cost is just \$10 for the year and since it is so close to the end of the year this would be for the remainder of 2023 and all of 2024, Becoming a member gets you the EAA 878 newsletter and all of the information from the special guest talks at the monthly meetings. This is a good deal since Adult membership is \$25 or \$35 for family membership.
