

EAA Chapter 878

OSHKOSH 2022

Following pictures from Wayne Flury

Some of the Announcer's Stand crew and friends "tailgating" at the conclusion of the afternoon. A regular occurrence, but this one was special as we paid homage to a dear recently departed friend.

Pedal planes made a parade onto Boeing Plaza for a photo op. They were having fun!!

The 2022 EAA Announcer's Stand crew

A large white cargo plane, likely a Boeing 747, is the central focus, parked on a tarmac at night. The plane's four engines are visible, with the outer two having red covers. The background is filled with a vibrant display of fireworks in various colors (blue, green, orange, white) exploding against a dark sky. A large crowd of people is visible on the tarmac around the plane. In the top right corner, the EAA Airventure Oshkosh 2022 logo is present.
