

## A Message from The President

Time is really flying by this year, with Oshkosh less than two months away. I know some of our members are making the trip, and I am looking forward to hearing all of the stories and learning about the new products.

This year they will have two Goodyear blimps at the show, and the west coast blimp that was part of my aviation experience is based in my former hometown of Carson CA. It was a familiar sight for me as the approach to their landing field was very close to my home. My dad worked for Goodyear out at Litchfield Park in the 1960s, so the connection is strong.

We continue to see good progress with our scholars, and I want to recognize Larry Battin and Chuck Losinski for making all of the parts of the puzzle to come together. We held the kickoff meeting in late May for Matreiya Viafora, our latest Ray Scholar, and she is already a student with Untethered.

As we move into summer we need to be mindful of the heat and sun, and make sure that you are focused on hydration, sun stroke and heat fatigue. You need to understand the symptoms from both your perspective but also what a potential victim exhibits.

I hope you have a wonderful and safe summer!

**Could this mini turbine engine revolutionize general aviation?** - Fly along with AOPA Editor at Large Dave Hirschman in a Bristell light sport airplane equipped with a 141 horsepower Turbotech turbine engine. The engine offers incredible performance while burning much less fuel than a traditional turboprop. Click [Here](#) for the video article from AOPA!

**Suburban man brings history back to life with 75-foot WWII aircraft** - Every small town has its dreamer and along the quiet farm lined roads of Marengo, Illinois, that dreamer is Mike Kellner. For 40 years, he has been working away in a barn to bring a ghost back to life. The ghost is a 75-foot-long, gleaming aluminum WWII warbird known as the B-17. WGN's Erin McElroy brings you the story.
