PRESIDENTS MESSAGE

1989 has started off with a bang! Pete Courtney's talk about the Deadalus project was most informative and interesting. It's amazing what can be accomplished using recently developed technologies and materials.

We began our work toward Air Fair 1989 to be held June 10th. Joel Levine has volunteered for ground control and Ed Booth is going to manage the poker run. Frank Flessel is going to run the mini-theater.

We need: A food and drink manager.
A static display & exhibit manager.
A publicity manager.

Please think about these jobs. Due to our past experience they aren't hard anymore and you will get plenty of willing help.

We need a publicity manager in place soon so we can plan our advertising campaign.

Frank Wilcox, Dwayne Huff and Henry Warner have come forward to manage the EAA "Super Saturday" program. We are scheduling this for the end of April, possibly April 29th. The 15 or so chapter members who help accomplish this will find it a very rewarding experience.

Your suggestions for hands on building experience are worth trying. So, we are going to try for a welding workshop at the Stalcup's aero factory on Saturday, April 1.

We will demonstrate welding aircraft tubing then let you try your hand at it.

If this workshop works we will try to do the same with composite construction and riveting later in the year.

Be sure to mark your calendar for our next family event. The chili cook-off Saturday March 11th at the Chestnut's aerodrome. We will have this rain or shine (Phil has a big hanger).

At the February meeting we will cast a ballot to select the chapter member who has contributed the most during 1988.
